Boden,2006 The development of cognitive science is one of the most remarkable and fascinating intellectual achievements of the modern era It brings together psychology neuroscience artificial intelligence computing philosophy linguistics and anthropology in the project of understanding the mind by modelling its workings Oxford University Press now presents a masterful history of cognitive science told by one of its most eminent practitioners Natural Fabrications William Seager,2012-08-13 The spectacular success of the scientific enterprise over the last four hundred years has led to the promise of an all encompassing vision of the natural world In this elegant picture everything we observe is based upon just a few fundamental processes and entities The almost infinite variety and complexity of the world is thus the product of emergence But the concept of emergence is fraught with controversy and confusion This book ponders the question of how emergence should be understood within the scientific picture and whether a complete vision of the world can be attained that includes consciousness Resistance to Belief Change Joseph R. Lao,Jason Young,2019-09-30 This book examines the human proclivity to resist changing our beliefs Drawing on psychological neurological and philosophical research and integrating topics as wide ranging as emotion cognition social and physical context and learning theory Lao and Young explore why this resistance to change impedes our learning and progression They also suggest that failure to adapt our beliefs to available and informed evidence can incur costs that may be seen in personal growth politics science law medicine education and business Resistance to Belief Change explores the various manifestations of resistance including overt discursive and especially inertial forms of resistance As well as the influential factors that can impact upon them the book also examines

how the self directed learner as well as teachers may structure the learning experience to overcome resistance and facilitate progressive and adaptive learning Lao and Young find that the impediments to learning and resistance to change are far more prevalent and costly than previously suggested in research and so this book will be of interest to a range of people in cognitive development social psychology and clinical and educational psychology Physical and Motor Development in Mental Retardation A. Vermeer, W. E.
