Sustainable Food Processing and Engineering Challenges Charis M. Galanakis, 2021-03-16 Sustainability is becoming a major item for the food industry around the world as resources become more restricted and demand grows Food processing ensures that the resources required producing raw food materials and ingredients for food manufacturing are used most efficiently Responding to the goals of sustainability requires the maximum utilization of all raw materials produced and integration of activities throughout all the production to consumption stages To maximize the conversion of raw materials into consumer products food engineering and food processing challenges should be met Sustainable Food Processing and Engineering Challenges covers the most trend topics and challenges of sustainable food processing and food engineering giving emphasis in engineering packaging for a sustainable food chain food processing technologies Industry 4.0 applied to food food digestion engineering sustainable alternative food processing technologies physico chemical aspects of food cold plasma technology refrigeration climate control non thermal pasteurisation and sterilization nanotechnology and alternative

processes requiring less resources sustainable innovation in food product design etc Edited by a multiple team of experts the book is aimed at food engineers who are seeking to improve efficiency of production systems and also researchers specialists chemical engineers and professionals working in food processing Covers the most trend topics and challenges of sustainable food processing and food engineering Brings developments in methods to reduce the carbon footprint of the food system Explores emerging topics such as Industry 4.0 applied to food and Food digestion engineering *Global Trends in Agricultural Demand, Productivity, and Supply, 1978-1986* Mary E. Lassanyi, 1987 *RANN 2*, 1977 *Food and Nutrition Information and Educational Materials Center catalog* Food and Nutrition Information Center (U.S.), 1976 **Future Impacts of Biotechnology on Agriculture, Food Production and Food Processing** Klaus Menrad, Demosthenes Agrafiotis, Christien M. Enzing, Louis Lemkow, Fabio Terragni, 2013-06-29 Although the first Agro Food products based on modern biotechnology e.g. recombinant chymosin for cheese production tomato puree based on genetically engineered tomatoes herbicide resistant genetically modified soybean insect resistant maize have been introduced in the EU markets in recent years the application of this technology is still being intensively discussed in the European Union Recent opinion polls indicate as well that consumers acceptance of genetically engineered food and agro products still is relatively low e.g. European Commission 1997 Hampel et al 1997 at least in some member states of the EU In contrast representatives from politics and industry underline the necessity to apply modern biotechnology in the Agro Food sector as well mainly to ensure the competitiveness of EU agriculture and food industry and for employment reasons Against this background there seems to be a need for a scientific analysis of the future impacts of modern biotechnology in the Agro Food sector of the EU Recent studies trying to analyse this issue e.g. OECD 1992 Teuber 1992 usually comprise extrapolations of status quo analyses What has not been exploited so far in this context are systematic technology forecasting approaches which do not include only one single country but get information on an international level Therefore the impacts of modern biotechnology on the Agro Food sector in five member countries of the EU Germany Greece Italy the Netherlands and Spain have been analysed with the help of the Delphi methodology which represents one of the most reliable tools for technology forecasting **Case Studies on Sustainability in the Food Industry** Samuel O. Idowu, René Schmidpeter, 2022-09-23 The world's population continues to grow year after year putting pressure on all global resources This book provides examples of how we can deal with all the challenges associated with aspects of population growth in the quest for sustainable development It presents case studies on different areas of sustainability in the food industry which includes food production and consumption The collection of illustrative examples includes cases from agriculture and fisheries the food refining sector the supply chain wholesale and retail channels and other relevant aspects that enhance our understanding of how sustainability takes place in this global sector The book will appeal to a wide readership from practitioners to researchers teachers and students worldwide
