Reading Medieval Images The Art Historian And The Object:

Reading Medieval Images Elizabeth Sears, Thelma K. Thomas, 2002 What is it that art historians do when they approach works of art What kind of language do they use to describe what they see How do they construct arguments using visual evidence What sorts of arguments do they make In this unusual anthology eighteen prominent art historians specializing in the medieval field European Byzantine and Islamic provide answers to these fundamental questions not directly but by way of example Each author responding to invitation has chosen for study a single image or object and has submitted it to sustained analysis The collection of essays accompanied by statements on methodology by the editors offers an accessible introduction to current art historical practice Elizabeth L. Sears is Associate Professor of the History of Art University of Michigan Thelma K. Thomas is Associate Professor of the History of Art and Associate Curator of the Kelsey Museum University of Michigan

The Marvellous and the Monstrous in the Sculpture of Twelfth-century Europe Kirk Ambrose, 2013 Richly illustrated consideration of the meaning of the carvings of non human beings from centaurs to eagles found in ecclesiastical settings Representations of monsters and the monstrous are common in medieval art and architecture from the grotesques in the borders of illuminated manuscripts to the symbol of the green man widespread in churches and cathedrals These mysterious depictions are frequently interpreted as embodying or mitigating the fears symptomatic of a dark age This book however considers an alternative scenario in what ways did monsters in twelfth century sculpture help audiences envision perhaps even achieve various ambitions Using examples of Romanesque sculpture from across Europe with a focus on France and northern Portugal the author suggests that medieval representations of monsters could service ideals whether intellectual political religious and social even as they could simultaneously articulate fears he argues that their material presence energizes works of art in paradoxical even contradictory ways In this way Romanesque monsters resist containment within modern interpretive categories and offer testimony to the density and nuance of the medieval imagination KIRK AMBROSE is Associate Professor Chair Department of Art and Art History University of Colorado Boulder

and brings the disciplines and experts of the field together *Women Readers and Writers in Medieval Iberia* Montserrat Piera, 2019-08-05 This book is devoted to medieval Iberian women readers and writers Focusing on the stories and texts women heard visually experienced or read and the stories that they rewrote the work explores women's experiences and cultural practices and their efforts to make sense of their place within their familial networks and communities The study is based on two methodological and interpretive threads a new paradigm to represent premodern reading and a study of women's writing or more precisely women's textualities as a process of creating words but also acts social practices emotions and ultimately affectus understood here as the embodiment of the ability to affect and be affected **Medieval Women**

and Their Objects Jennifer Adams, Nancy Bradbury, 2021-03-11 The essays gathered in this volume present multifaceted considerations of the intersection of objects and gender within the cultural contexts of late medieval France and England Some take a material view of objects showing buildings books and pictures as sites of gender negotiation and resistance and as extensions of women's bodies Others reconsider the concept of objectification in the lives of fictional and historical medieval women by looking closely at their relation to gendered material objects taken literally as women's possessions and as figurative manifestations of their desires The opening section looks at how medieval authors imagined fictional and legendary women using particular objects in ways that reinforce or challenge gender roles These women bring objects into the orbit of gender identity employing and relating to them in a literal sense while also taking advantage of their symbolic meanings The second section focuses on the use of texts both as objects in their own right and as mechanisms by which other objects are defined The possessors of objects in these essays lived in the world their lives documented by historical records yet like their fictional and legendary counterparts they too used objects for instrumental ends and with symbolic resonances The final section considers the objectification of medieval women's bodies as well as its limits While this at times seems to allow for a trade in women authorial attempts to give definitive shapes and boundaries to women's bodies either complicate the gender boundaries they try to contain or reduce gender to an ideological abstraction This volume contributes to the ongoing effort to calibrate female agency in the late Middle Ages honoring the groundbreaking work of Carolyn P Collette
