Reading To You:

A Guide to Fast and Effective Reading Derya Ünal, 2025-06-10 When people think of speed reading they often put it down to just speed reading However this is only a small part of the overall process The key to truly effective speed reading is to first be able to determine what you really want to read or what you need and then quickly read through carefully selected material Take a moment to mentally review all the information that comes your way on a typical day at home at work in the newspapers at the local coffee shop How much of it do you ignore because it seems like too much to take on instead you leave it to pile up and pile up until you're so far behind that you need days or weeks to catch up If you had a simple process that allowed you to quickly and easily identify the information you needed and eliminate the ones you didn't you wouldn't have that body of knowledge and you'd have more time to live your life instead of worrying about what you might miss out on because you feel overburdened The purpose of this book is to give you the tools you need to stay current With a one week work program and study exercises it allows you to work by solving the exercises by having fun in an easy and understandable way At first read the information provided for 7 days and then do the exercises as directed

Personalising Learning in the Primary Classroom Dr Elaine Wilmot, 2006-10-09 Personalising learning is the hot topic on the government s education agenda It is seen to be the way forward to get the very best out of every child and it forms the focus of this timely new book by Crown House Publishing Personalising Learning in the Primary Classroom will Challenge the schools thinking about how they teach Encourage schools to put the learner at the heart of the educational agenda Support primary schools in their work to meet this challenge Consider all aspects of learning and teaching in the primary school and Provide useful questions for the reader to consider their own working practices in the context of personalising learning Personalising learning is seen as a powerful solution to reforming our current education system in order to meet individual learning needs and thereby raise standards Where current thinking has personalising learning in the secondary sector the author argues that for personalising learning to be successful children must start making real choices about their learning from the earliest age and must be guided and coached through their primary years rather than being taught in the traditional way She argues that the curriculum should be made to fit the child rather than the child being pushed through the sausage factory education systems as it currently stands The book is packed with practical ideas that have been tried and tested in a real school and have proved popular with staff parents and pupils and Ofsted It considers all aspects of learning and teaching in the primary school and provides useful questions for the reader to consider their own working practices in the context of personalising learning
