An area of linguistic research can be considered mature when the validity of theoretical and empirical results is tested cross
linguistically and when predictions from different languages influence and modify the course of theoretical development The
semantics pragmatics interface poses a special challenge in this respect because of its interdisciplinary and multi theoretical
nature This volume attempts to bridge the gap between theory and empirical analysis by focussing on several aspects of the
semantics and the pragmatics of Spanish from a variety of theoretical points of view Some of the papers were selected from
those presented at the International Conference Semantics and Pragmatics of Spanish Ohio State University 1999 Others are
invited contributions from leading scholars in the field Among the topics covered are several that have been the subject of
intense debate whereas others represent subtle data patterns not considered so far The topics include the proper
characterization of tense and aspect the subjunctive verbal periphrases stage individual level predication the interpretation
of infinitives in embedded and adjunct clauses the subjunctive mood demonstratives quantification of excess exception
phrases binding phenomena propositional negative polarity items particles of politeness and pronominal doubling Overall the
analysis of these subjects contributes new findings to prominent theories in the field such as possible world semantics
relevance theory mental spaces type coercion generalized quantifier theory dynamic semantics and the theory of logical form
