Marley,2019-05-23 This volume is the result of a conference held at the University of California Irvine on the topics that provide its title choice decision and measurement The conference was planned and the volume prepared in honor of Professor R Duncan Luce on his 70th birthday Following a short autobiographical statement by Luce the volume is organized into four topics to each of which Luce has made significant contributions The book provides an overview of current issues in each area and presents some of the best recent theoretical and empirical work Personal reflections on Luce and his work begin each section These reflections were written by outstanding senior researchers Peter Fishburn Preference and Decision Making Patrick Suppes Measurement Theory and Axiomatic Systems William J McGill Psychophysics and Reaction Time and W K Estes Choice Identification and Categorization The first section presents recent theoretical and empirical work on descriptive models of decision making and theoretical results on general probabilistic models of choice and ranking Luce s recent theoretical and empirical work on rank and sign dependent utility theory is important in many of these contributions The second section presents results from psychophysics probabilistic measurement aggregation of expert opinion and test theory The third section presents various

process oriented models with supportive data for tasks such as redundant signal detection forced choice and absolute identification The final section contains theory and data on categorization and attention and general theoretical results for developing and testing models in these domains

Studies in Econometrics, Time Series, and Multivariate Statistics Samuel Karlin, Takeshi Amemiya, Leo A. Goodman, 2014-05-10 Studies in Econometrics Time Series and Multivariate Statistics covers the theoretical and practical aspects of econometrics social sciences time series and multivariate statistics This book is organized into three parts encompassing 28 chapters Part I contains studies on logit model normal discriminant analysis maximum likelihood estimation abnormal selection bias and regression analysis with a categorized explanatory variable This part also deals with prediction based tests for misspecification in nonlinear simultaneous systems and the identification in models with autoregressive errors Part II highlights studies in time series including time series analysis of error correction models time series model identification linear random fields segmentation of time series and some basic asymptotic theory for linear processes in time series analysis Part III contains papers on optimality properties in discrete multivariate analysis Anderson's probability inequality and asymptotic distributions of test statistics This part also presents the comparison of measures multivariate majorization and of experiments for some multivariate normal situations Studies on Bayes procedures for combining independent F tests and the limit theorems on high dimensional spheres and Stiefel manifolds are included This book will prove useful to statisticians mathematicians and advance mathematics students

The Pleasures of Statistics Frederick Mosteller, 2010-03-10 From his unique perspective renowned statistician and educator Frederick Mosteller describes many of the projects and events in his long career From humble beginnings in western Pennsylvania to becoming the founding chairman of Harvard University's Department of Statistics and beyond he inspired many statisticians scientists and students with his unabashed pragmatism creative thinking and zest for both learning and teaching This candid account offers fresh insights into the qualities that made Mosteller a superb teacher a prolific scholar a respected leader and a valued advisor A special feature of the book is its chapter length insider accounts of work on the pre election polls of 1948 statistical aspects of the Kinsey report on sexual behavior in the human male mathematical learning theory authorship of the disputed Federalist papers safety of anesthetics and a wide ranging examination of the Coleman report on equality of educational opportunity This volume is a companion to Selected Papers of Frederick Mosteller Springer 2006 and A Statistical Model Frederick Mosteller's Contributions to Statistics Science and Public Policy Springer Verlag 1990 Frederick Mosteller 1916 2006 was Roger I Lee Professor of Mathematical Statistics at Harvard University His manuscript was unfinished at his death and has been updated

Issues in Mathematical Linguistics Carlos Martín Vide, 1999 This brief collection of refereed papers approaches several technical as well as methodological aspects of the mathematical formalization of natural language particularly in syntax and in semantics Such kind of investigation is a prerequisite for the computational processing of language and is narrowly related to current developments in other disciplines namely theoretical

computer science and mathematical logic The volume offers a coherent picture of recent research on the mathematics of language and may be of interest to a wide audience from linguists to mathematicians Detailed indexes of authors and topics provide an easy access to the contents A Statistical Model Stephen E. Fienberg, David C. Hoaglin, William H.

Kruskal, Judith M. Tanur, 2012-12-06 A large number of Mosteller's friends, colleagues, collaborators and former students have contributed to the preparation of this volume in honor of his 70th birthday It provides a critical assessment of Mosteller's professional and research contributions to the field of statistics and its applications **Readings in Formal Epistemology**

Horacio Arló-Costa, Vincent F. Hendricks, Johan van Benthem, 2016-06-07 This volume presents 38 classic texts in formal epistemology and strengthens the ties between research into this area of philosophy and its neighbouring intellectual disciplines The editors provide introductions to five subsections Bayesian Epistemology Belief Change Decision Theory Interactive Epistemology and Epistemic Logic Formal epistemology is a term coined in the late 1990s for a new constellation of interests in philosophy the origins of which are found in earlier works of epistemologists philosophers of science and logicians It addresses a growing agenda of problems concerning knowledge belief certainty rationality deliberation decision strategy action and agent interaction and it does so using methods from logic probability computability decision and game theory The volume also includes a thorough index and suggestions for further reading and thus offers a complete teaching and research package for students as well as research scholars of formal epistemology philosophy logic computer science theoretical economics and cognitive psychology Aspects of the Theory of Syntax Noam Chomsky, 1969-03-15 Chomsky

proposes a reformulation of the theory of transformational generative grammar that takes recent developments in the descriptive analysis of particular languages into account Beginning in the mid fifties and emanating largely from MIT an approach was developed to linguistic theory and to the study of the structure of particular languages that diverges in many respects from modern linguistics Although this approach is connected to the traditional study of languages it differs enough in its specific conclusions about the structure and in its specific conclusions about the structure of language to warrant a name generative grammar Various deficiencies have been discovered in the first attempts to formulate a theory of transformational generative grammar and in the descriptive analysis of particular languages that motivated these formulations At the same time it has become apparent that these formulations can be extended and deepened The major purpose of this book is to review these developments and to propose a reformulation of the theory of transformational generative grammar that takes them into account The emphasis in this study is syntax semantic and phonological aspects of the language structure are discussed only insofar as they bear on syntactic theory Selected Papers of Frederick Mosteller

Stephen E. Fienberg, David C. Hoaglin, 2007-02-01 One of the best known statisticians of the 20th century Frederick Mosteller has inspired numerous statisticians and other scientists by his creative approach to statistics and its applications This volume collects 40 of his most original and influential papers capturing the variety and depth of his writings It is hoped

that sharing these writings with a new generation of researchers will inspire them to build upon his insights and efforts

Forms and Degrees of Repetition in Texts Gabriel Altmann, Reinhard Köhler, 2015-03-10 The present volume presents objective methods to detect and analyse various forms of repetitions Repetition of textual elements is more than a superficial phenomenon It may even be considered as constitutive for units and relations in a text on a primary level when no other way exists to establish a unit as in a musical composition a motif can be recognised as such only after at least one repetition and on a secondary artistic level where repetition is a consequence of the transfer of the equivalence principle from the paradigmatic axis to the syntagmatic one as showed by R Jakobson The analysis of repetitive elements and structures in texts with objective mathematical means can serve several practical and theoretical purposes among them Characterisation of texts by means of parameters measures indicators as taken from established mathematical statistics or specifically constructed ones in individual cases Comparison of texts on the basis of their quantitative characteristics and classification of the texts by the results Research for the laws of text which control the mechanisms connected to text creation As a remote aim the construction of a theory of text consisting of a system of text laws The final attempt of every possible quantitative text analysis is the construction of a text theory The book illustrates this on examples of such laws and corresponding empirical tests Nomination United States.
