The contributions in this volume are vivid and rich in original approaches that can spur exchanges and debates with other philosophical traditions **Hans Jonas's Ethic of Responsibility** Theresa Morris, 2013-12-01 Articulates the fundamental importance of ontology to Hans Jonas's environmental ethics. Despite his tremendous impact on the German Green Party and the influence of his work on contemporary debates about stem cell research in the United

States Hans Jonas's 1903-1993 philosophical contributions have remained partially obscured. In particular, the ontological grounding he gives his ethics based on a phenomenological engagement with biology to bridge the is-ought gap has not been fully appreciated. Theresa Morris provides a comprehensive overview and analysis of Jonas's philosophy that reveals the thread that runs through all of his thought, including his work on the philosophy of biology, ethics, the philosophy of technology, and bioethics. She places Jonas's philosophy in context, comparing his ideas to those of other ethical and environmental philosophers and demonstrating the relevance of his thought for our current ethical and environmental problems. Crafting strong supporting arguments for Jonas's insightful view of ethics as a matter of both reason and emotion, Morris convincingly lays out his account of the basis of our responsibilities not only to the biosphere but also to current and future generations of beings.
