to us if less romantic than a tale of the origins of astronomy might be A peek into the labs and offices of botanists limnologists and biogeochemists might not seem like the acme of excitement Hagen inspires us with his insights He makes his subject meaningful to us Though it is not pleasure reading by any stretch its clear sighted intellectual vigor makes An Entangled Bank pure enjoyment U.S. Environmental Protection Agency Library System Book Catalog United States. John Kress,Gary W. Barrett,2016-02-02 In the twentieth century scientists in the relatively new field of biology played an important role in exposing the threats of environmental degradation loss of species diversity habitat fragmentation scarce energy resources and human population growth In the essays found in *A New Century of Biology* some of the world s most notable biologists consider how their discipline must evolve to address these problems in the twenty first century The next one hundred years the contributors argue will likely be dominated by breakthroughs in evolutionary biology and systems ecology by an increased need for scientists to integrate research teaching and service missions and by problem solving ventures on greater spatial and temporal scales Because human activity and increased population will continue to have a profound impact on the environment biologists must define an effective strategy for integrating the biological sciences with global economics and human social structure The eleven contributors are leaders in the fields of ecology and evolution morphology and

development behavior microbiology ecosystem energetics and biogeochemistry biodiversity and conservation biology and human sciences While acknowledging the real problems their discipline must address they offer an optimistic agenda for the future **Catalogue of the Population Council Library, New York: Subject catalogue** Population Council.
