Loftus,1996 Every year hundreds of defendants are convicted on little more than the say so of a fellow citizen Although psychologists have suspected for decades that an eyewitness can be highly unreliable new evidence leaves no doubt that juries vastly overestimate the credibility of eyewitness accounts It is a problem that the courts have yet to solve or face squarely In *Eyewitness Testimony* Elizabeth Loftus makes the psychological case against the eyewitness Beginning with the basics of eyewitness fallibility such as poor viewing conditions brief exposure and stress Loftus moves to more subtle factors such as expectations biases and personal stereotypes all of which can intervene to create erroneous reports Loftus also shows that eyewitness memory is chronically inaccurate in surprising ways An ingenious series of experiments reveals that memory can be radically altered by the way an eyewitness is questioned after the fact New memories can be implanted and old ones unconsciously altered under interrogation These results have important implications for court reform police interrogation methods defense strategy and many other aspects of criminal and civil procedure *Eyewitness Testimony* is a powerful book that should be required reading for trial lawyers social psychologists and anyone who considers the chilling prospect of confronting an eyewitness accusation in a court of law **Sport, Exercise and Performance Psychology** Edson Filho,Itay Basevitch,2021 This book presents 125 critical research questions to advance the field of sports exercise and performance psychology with 5 must read papers per chapter With contributions from expert researchers in their respective areas this book focuses on performance and learning health and wellbeing and cultural and professional considerations The Natural and the Normative Gary Carl Hatfield,1990 Gary Hatfield examines theories of spatial perception from the seventeenth to the nineteenth century and provides a detailed analysis of the works of Kant and Helmholtz who adopted opposing stances on whether central questions about spatial perception were amenable to natural scientific treatment At stake were the proper understanding of the relationships among sensation perception and experience and the proper methodological framework for investigating the mental activities of judgment understanding and reason issues which remain at the core of philosophical psychology and cognitive science Hatfield presents these important issues as living philosophies of science that shape and are shaped by actual research programs creating a complex and fascinating picture of the entire nineteenth century battle between nativism and empiricism His examination of Helmholtz s work in physiological optics and epistemology is a tour de force Gary Hatfield is Associate Professor of Philosophy at the University of Pennsylvania **The Psychological Foundations of Education** Olga K.
