Ephross, 2011 *Group Work With Populations at Risk* Third Edition is a fundamental resource for practitioners in health and mental health settings and a comprehensive guidebook of group work skills. Each chapter describes the population and reviews the relevant literature, identifies themes and practice principles, presents a case illustration, provides evaluation guidance, and refers readers to key references and web resources. Understanding Child Maltreatment Maria Scannapieco, Kelli Connell-Carrick, 2005-02-10 Child maltreatment professionals from all disciplines struggle to find better ways of understanding and treating the families and children affected by maltreatment. Since the mid 1960s, the battered child syndrome and recent high profile abuse cases have spawned a plethora of research and literature on child maltreatment, yet this is the first volume to offer a comprehensive integrated analysis for understanding, assessing, and treating child maltreatment within the ecological framework in a developmental context. This framework systematically organizes and integrates the complex empirical literature in child maltreatment and development, including the often overlooked period of adolescence. Viewing child maltreatment from an ecological perspective, this volume identifies the risk and protective factors correlated with abuse and neglect. The authors present a comprehensive assessment framework addressing the multiple developmental and environmental factors unique to each case. This framework fully considers risk and protective factors and their relationship to individuals, families, and environmental elements, presenting a much needed perspective for today's child protective services workers. *Understanding Child Maltreatment* is the first of its kind. While most books broadly address the developmental consequences of maltreatment, this volume goes further by proposing assessment and intervention strategies based on a deep understanding of each stage of a child's development. Interventions center on the caregiver and the family, with particular attention to parenting skills and the challenges the child may experience within his or her developmental stage. Each chapter emphasizes empirically based interventions and includes a case illustration that guides readers in applying these concepts to their own practice. Providing a comprehensive, nuanced perspective on maltreatment, this book will be invaluable to students, researchers, and professionals.
