El-Hi Textbooks & Serials in Print, 2000 ,2000 **Rethinking Disability and Mathematics** Rachel
Lambert,2024-04-15 Every child has a right to make sense of math and to use math to make sense of their worlds Despite
their gifts students with disabilities are often viewed from a deficit standpoint in mathematics classrooms These students are
often conceptualized as needing to be fixed or remediated Rethinking Disability and Mathematics argues that mathematics
should be a transformative space for these students a place where they can discover their power and potential and be
appreciated for their many strengths Author Rachel Lambert introduces Universal Design for Learning for Math UDL Math a
way to design math classrooms that empowers disabled and neurodiverse students to engage in mathematics in ways that
lead to meaningful and joyful math learning The book showcases how UDL Math can open up mathematics classrooms so that
they provide access to meaningful understanding and an identity as a math learner to a wider range of students Weaved
throughout the book are the voices of neurodiverse learners telling their own stories of math learning Through stories of real
teachers recognizing the barriers in their own math classrooms and redesigning to increase access the book Reframes
students with disabilities from a deficit to an asset perspective paving the way for trusting their mathematical thinking Offers
equitable math instruction for all learners including those with disabilities neurodiverse students and or multilingual learners
Applies UDL to the math classroom providing practical tips and techniques to support students cognitive affective and
strategic development Immerses readers in math classrooms where all students are engaged in meaningful mathematics
from special education day classes to inclusive general education classrooms from grades K 8 Integrates research on
mathematical learning including critical math content such as developing number sense and place value fluency with math
facts and operations and understanding fractions and algebraic thinking Explores critical issues such as writing IEP goals in
math This book is designed for all math educators both those trained as general education teachers and those trained as
special education teachers The UDL Math approach is adapted to work for all learners because everyone varies in how they
perceive the world and in how they approach mathematical problem solving When we rethink mathematics to include
multiple ways of being a math learner we make math accessible and engaging for a wider group of learners Subject
Guide to Books in Print ,1996 The Cumulative Book Index ,1998 A world list of books in the English language
American Book Publishing Record ,1998 *Kits, Games, and Manipulatives for the Elementary School Classroom*
