Essentials of Real Estate Economics Richard M. Betts, Monte Cicino, 2021 California Real Estate Economics Ignacio Gonzalez, 2003 **Economics, Real Estate and the Supply of Land** Alan W. Evans, 2008-04-30 The book draws together the economic literature relating to the supply of land for development The standard view appears to be that the owners of land have no interest other than to allow their land to be used for the activity which would yield the highest income But in reality this is not so and the book's aim is to demonstrate this to set out the reasons and to show the economic effects of the fact that landowners have other motives The book covers the supply of land for urban development and shows how land has characteristics which differentiate it from other factors of production which will also affect its supply for some uses e.g. land is fixed in location and its price and value are inseparable from where it is New light is cast on the market for land by concentrating on the supply side and on land use planning by taking an economic viewpoint California Real Estate Economics Ignacio Gonzalez, Urban Economics and Real Estate John F. McDonald, Daniel P.
