Elite Configurations at the Apex of Power Mattéi Dogan,2003 This book prepared under the auspices of the IPSA Research Committee on Political Elites focuses on the interpenetration between various types of elites The contributions to this book reveal contrasting patterns of recruitment and selection in terms of career paths visibility influence and power of different elite circles *Values and Attitudes Across Nations and Times* Masamichi S. Sasaki,1998 The pursuit of knowledge is of necessity both a comparative and an interdisciplinary enterprise The authors of this volume drawn from divers areas of social studies present a unique position on the continuum of comparative science from the pursuit of qualitative to quantitative knowledge Taking values and attitudes separately and in combination and comparing them across nations and time the works contained in this study identify a matrix of nine possible themes And while no single article addresses all nine of the themes taken as a whole they have covered all of them and even suggested new and interesting avenues for further research In developing their thoughts on cross national and cross cultural comparisons the comparative scientific continuum has come full circle in the contributions of the authors presented here Through a Glass, Darkly Wil Arts,2000-01-12 In today's European arts and sciences most of the time we see not only other but also our own cultural traditions and the different forms of modernity like a dim image in a mirror And the future of our own and other cultures seems to be shrouded in mystery because our gift of knowledge and inspired messages are only partial The question this book addresses is whether it is possible to get an almost face to face intimacy with various forms of cultural tradition and modernity by using our experiences and our powers of imagination i.e. our expectations in a more fruitful way The contributors to this book try to give answers to this weighty question by taking as a guideline Erasmus's famous motto *ad fontes* i.e. always go to the sources

Without however nursing the illusion that our partial knowledge will ever be complete Is there they ask a real chasm between the modern West and the traditional East as so many authors have argued And if so how deep is the chasm and how is it to be bridged How much do people in the West know about their own cultural tradition and the modern times they live in How much do they know of the traditions and the modernities of the East and how much do they need to know in order to cope with what the future will probably bring Are our images of cultural tradition and modernity in East and West in Past and Present so blurred that we look at them as through a glass darkly What the contributors to this book argue for is the necessity of looking at developments both in East and West both in Past and Present from a wider perspective of taking a global point of departure They argue for greater understanding and communication between cultures for cultural pluralism as distinct from cultural relativism They argue for the open tolerant non dogmatic and critical thought that was the most important characteristic of Erasmus s philosophy The chapters in this book can be useful to a broad audience and a range of social scientists and historians who are interested in the understanding of the relation between Past and Present Tradition and Modernity East and West *Globalization and the Evolving World Society* ,2021-11-01 The societies of the present world are experiencing many turbulent changes New forces of change and modernization are driving people business and cultures across borders The world has become a home to a new generation of homo sapiens who are curious about others but at the same time cherish to preserve their own cultures What is the nature of this evolving world society Is the world driving toward a new global civilization an end of history or an inevitable civilizational clash The present volume has brought together leading scholars in the field to examine the concept of globalization deliberate on the character of its multifaceted nature and expressions and delineate its impact on the emerging world economy politics culture and science A number of substantive issues such as the emergence of new global economic inequality culture and the role of the trans nationals nature of the emerging global environmental regimes rise of the NICs and the conflicting role of the nation states in the face of the advancing forces of globalization are addressed It is contended that globalization should be perceived neither as an unbounded economic progress nor as an expansion of western domination Globalization is rather defined as a new development strategy a process of change that can be planned guided and controlled For national political and business leaders of the world the volume provides a blueprint of the emerging areas of policy concerns and guidance For the world of social science it presents a road map of the emerging intellectual issues and challenges Contributors are Alessandro Bonanno Stephen W K Chiu Douglas Constance Richard J Estes R Scott Frey Archibald O Haller George A Miller Proshanta K Nandi Winifred R Poster J Timmons Roberts Shahid M Shahidullah Bam Dev Sharda and Alvin Y So *South Africa: The Limits of Reform Politics* Adam,2022-03-28 *Canada and South Asian Development* Choudhry,2021-11-01 **New Directions in Quantitative Comparative Sociology** ,2021-10-18 The comparative method is at the core of sociological inquiry and gained new importance emphasis and practitioners particularly after the second world war as a consequence of a large variety of

international and global scale developments The contributions to this book regard nations or countries as contextual units of analysis and treat them as variables Theoretical explanations are presented of how social phenomena are systematically related to characteristics of the nation states and these explanations are tested empirically using the qualitative tools of mainstream sociology The chapters in this book can be useful to a broad audience and a range of social scientists who are interested in the understanding of contemporary social phenomena that are no longer limited to national borders but that are transnational or of a global order Contributors are Toril Aalberg Wil Arts Carole B Burgoyne Loek Halman Piet Hermkens Guillermina Jasso Mebs Kanji James R Kluegel Ola Listhaug David S Mason Petr Mat ju Neil Nevitte Thorleif Pettersson David A Routh Svetlana Sidorenko Stephenson Johan Verweij Bernd Wegener and Peter Van Wijck
