Religion And The People Of Western Europe 1789 197:

Religious Experience and the Modernist Novel Pericles Lewis, 2010-01-07 The modernist period witnessed attempts to explain religious experience in non religious terms Such novelists as Henry James Marcel Proust James Joyce Virginia Woolf and Franz Kafka found methods to describe through fiction the sorts of experiences that had traditionally been the domain of religious mystics and believers In *Religious Experience and the Modernist Novel* Pericles Lewis considers the development of modernism in the novel in relation to changing attitudes to religion Through comparisons of major novelists with sociologists and psychologists from the same period Lewis identifies the unique ways that literature addressed the changing spiritual situation of the early twentieth century He challenges accounts that assume secularisation as the main narrative for understanding twentieth century literature Lewis explores the experiments that modernists undertook in order to invoke the sacred without directly naming it resulting in a compelling study for readers of twentieth century modernist literature

Secularisation in the Christian World Dr Michael Snape, Professor Callum G Brown, 2013-06-28 The power of modernity to secularise has been a foundational idea of the western world. Both social science and church history understood that the Christian religion from 1750 was deeply vulnerable to industrial urbanisation and the Enlightenment. But as evidence mounts that countries of the European world experienced secularising forces in different ways at different periods, the timing and causes of de Christianisation are now widely seen as far from straightforward. Secularisation in the Christian World brings together leading scholars in the social history of religion and the sociology of religion to explore what we know about the decline of organised Christianity in Britain, Europe, the United States, Canada and Australia. The chapters tackle different strands, themes, comparisons and territories to demonstrate the diversity of approach, thinking and evidence that has emerged in the last 30 years of scholarship into the religious past and present. The volume includes both new research and essays of theoretical reflection by the most eminent academics. It highlights historians and sociologists in both agreement and dispute. With contributors from eight countries, the volume also brings together many nations for the first consolidated international consideration of recent themes in de Christianisation. With church historians and cultural historians and religious sociologists and sociologists of the godless society, this book provides a

state of the art guide to secularisation studies *Secularization and Religious Innovation in the North Atlantic World* David Hempton, Hugh McLeod, 2017-05-12 In the early twenty first century it had become a cliché that there was a God Gap between a more religious United States and a more secular Europe The apparent religious differences between the United States and western Europe continue to be a focus of intense and sometimes bitter debate between three of the main schools in the sociology of religion According to the influential Secularization Thesis secularization has been an integral part of the processes of modernisation in the Western world since around 1800 For proponents of this thesis the United States appears as an anomaly and they accordingly give considerable attention to explaining why it is different For other sociologists however the apparently high level of religiosity in the USA provides a major argument in their attempts to refute the Thesis *Secularization and Religious Innovation in the Atlantic World* provides a systematic comparison between the religious histories of the United States and western European countries from the eighteenth to the late twentieth century noting parallels as well as divergences examining their causes and especially highlighting change over time This is achieved by a series of themes which seem especially relevant to this agenda and in each case the theme is considered by two scholars The volume examines whether American Christians have been more innovative and if so how far this explains the apparent God Gap It goes beyond the simple American European binary to ask what is American or European in the Christianity of the nineteenth and twentieth centuries and in what ways national or regional differences outweigh these commonalities **The 'Empty' Church Revisited** Robin Gill, 2017-07-05 When did churches start to appear more empty than full and why The very physicality of largely empty churches and chapels in Britain plays a powerful role in popular perceptions of religion Empty churches are frequently cited in the media as evidence of large scale religious decline The Empty Church Revisited presents a systematic account of British churchgoing patterns over the last two hundred years uncovering the factors and the statistics behind the considerable process of decline in church attendance Dispelling as myth the commonly held views that the process of secularization in British culture has led to the decline in churchgoing and resulted in the predominantly empty churches of today Gill points to physical factors economics and issues of social space to shed new light on the origins of empty churches This thoroughly updated edition of Robin Gill's earlier work *The Myth of the Empty Church* presents new data throughout to explore afresh the paradox of church building activity in a context of decline the patterns of urbanisation followed by sub urbanisation affecting churches changes in patterns of worship and changes within the sociology of religion in the last decade **Early Modern Europe, 1450-1789** Merry E. Wiesner, 2006-03-06 Accessible engaging textbook offering an innovative account of people's lives in the early modern period **Rethinking Political Identity** Colin Crouch, 2025-03-12 In this precisely argued book Colin Crouch questions the current meaning of political parties for citizens in Western Europe given that the identities on which they are based were the product of past conflicts over industrialization and religion Crouch asks whether the issues confronting post and ex industrial societies can develop their own political

identities among citizens And if so how far do these identities relate to the inheritance of the past **Love Now, Pay Later?** Nigel Yates,2011-01-01 Nigel Yates brings together the religious and social dimensions of the 1950s and 60s and examines the enormous changes in moral attitudes that took place in these two decades Much of the popular literature on post war Britain tends to present the 1950s as a period of continuing repression and respectability in the area of private and public morality and the 1960s as one in which there was rapid social change Using a wide range of contemporary sources books including novels magazines newspapers advertising fashion catalogues films and television as well as a number of significant archive collections Nigel Yates argues that changes in attitudes to religion and morality in the 1960s were only made possible by developments in the 1950s **Religion and Rebellion** Judith Devlin,Ronan Fanning,1997 **Vocationalism and Social Catholicism in Twentieth-century Ireland** Don O'Leary,2000 The purpose of this book is to present a comprehensive explanation of the origins development and decline of vocationalism in twentieth century Ireland Vocationalism based on papal social teaching featured prominently in social Catholicism through the 1930s and 40s The vocationalist lobby demanded radical reforms which if realized would have replaced the political economic and social structure of Irish national life with corporatist organizations based on Roman Catholic social principles In the newly independent southern Irish state with its large Catholic majority vocationalism attracted significant support and the extent of its popular appeal in the 1930s is reflected by the inclusion of vocationalist provisions in the Constitution of Ireland 1937 The popularization of vocationalist ideas occurred against a background of momentous political developments Popularization however did not lead to spontaneous proliferation and growth of vocational organizations Despite the difficulties which confronted them the vocationalists persisted with their demands attempting to persuade successive Irish governments to implement their recommendations This book examines the outcome of their protracted campaign focusing in particular on the attitude of amon de Valera *Losing a Kingdom, Gaining the World* Ambrogio A. Caiani,2023-10-12 Despite its many crises especially in Western Europe there are 1 3 billion Catholics in the world today The Church remains a powerful but controversial institution In *Losing a Kingdom Gaining the World* Ambrogio A Caiani explores the epic history of the Roman Catholic Church Throughout the early modern period the Pope was a secular prince in central Italy Catholicism was not merely a religion but also a political force to be reckoned with After the French Revolution the Church retreated into a fortress of unreason and denounced almost every aspect of modern life The Pope proclaimed his infallibility the cult of the Virgin Mary and her apparitions became articles of faith the Vatican refused all accommodation with the modern state until a disastrous series of concordats with fascist states in the 1930s These dark days threatened the very existence of the Church But as Catholicism lost its temporal power it made significant spiritual strides and expanded across continents Between 1700 and 1903 it lost a kingdom but gained the world Ambitious and authoritative this is an account of the Church s fraught encounter with modernity in all its forms from liberalism socialism and democracy to science literature and the rise of
