The European Wars of Religion Wolfgang Palaver,Harriet Rudolph,Dietmar Regensburger,2016-12-05 In recent years religion

has resurfaced amongst academics in many ways replacing class as the key to understanding Europe's historical development. This has resulted in an explosion of studies revisiting issues of religious change, confessional violence and holy war during the early modern period. But the interpretation of the European wars of religion still remains largely defined by national boundaries tied to specific processes of state building as well as nation building. In order to more thoroughly interrogate these concepts and assumptions, this volume focusses on terms repeatedly used and misused in public debates such as religious violence and holy warfare within the context of military conflicts commonly labelled religious wars. The chapters not only focus on the role of religion but also on the emerging state as a driver of the escalation of violence in the so-called age of religious war. By using different methodological and theoretical approaches, historians, philosophers and theologians engage in an interdisciplinary debate that contributes to a better understanding of the religious-political situation of early modern Europe and the interpretation of violent conflicts interpreted as religious conflicts today. By adopting a multidisciplinary approach, new and innovative perspectives are opened up that question if in fact religion was a primary driving force behind these conflicts.

Peace and Reconciliation Pauline Kollontai, 2016-05-13. Establishing a shared identity is an important part of any process of peace and reconciliation. This book discusses issues and theories of identity formation that can be implemented for peace and reconciliation from the perspectives of theology and religious studies whilst interacting with politics, socio-cultural studies and economics. By focusing on the theme of peace and reconciliation and employing an interdisciplinary approach, this volume will make a significant contribution to the discussion of the situation of the Korean peninsula and wider global contexts. The volume explores theoretical issues such as political and economic implications of reconciliation, interfaith and biblical perspectives and the role of religion in peace making. Furthermore, the contributors examine practical implications of the theme in the contexts of Germany, Northern Ireland, South Africa, India, East Asia, Bosnia Herzegovina and the Korean peninsula. The book offers invaluable insights for policy makers, academics and lay leaders, besides being an important tool for researchers and students of theology, religion, sociology, politics and history.

Collectivistic Religions Slavica Jakelc, 2016-05-23. *Collectivistic Religions* draws upon empirical studies of Christianity in Europe to address questions of religion and collective identity, religion and nationalism, religion and public life and religion and conflict. It moves beyond the attempts to tackle such questions in terms of choice and religious nationalism by introducing the notion of collectivistic religions to contemporary debates surrounding public religions. Using a comparison of several case studies, this book challenges the modernist bias in understanding of collectivistic religions as reducible to national identities. A significant contribution to both the study of religious change in contemporary Europe and the theoretical debates that surround religion and secularization, it will be of key interest to scholars across a range of disciplines including sociology, political science, religious studies and geography.
