## **Religion For A New Society:**

The Centrality of Religion in Social Life Eileen Barker, 2021-11-18 James A Beckford's work is internationally acclaimed not only in the sociology of religion but also in other fields of the social sciences Beckford has long been arguing that the barriers that have grown up between the different sub disciplines should be broken down with those specialising in religion becoming more cognisant of new theoretical developments and sociologists in general becoming more aware of the significance of developments in the religious scene This book is a collection of essays written in Beckford's honour drawing on a number of religious themes that have been central to Beckford's interests whilst also offering a significant contribution to our understanding of the wider society A central theme is modernity and its relation to the post modern and how religion affects and is affected by the dynamics of contemporary society with the primary focus of many of the chapters being a concern with how society copes with the minority religions that have become visible with the globalising tendencies of contemporary society The contributors who come from America Asia and various parts of Europe are all internationally renowned scholars Beckford's most important publications are listed in an Appendix and the volume opens with a short account of his contribution to sociology by Eileen Barker the editor and James T Richardson

### **Invented Religions**

Professor Carole M Cusack, 2013-06-28 Utilizing contemporary scholarship on secularization individualism and consumer capitalism this book explores religious movements founded in the West which are intentionally fictional Discordianism the Church of All Worlds the Church of the SubGenius and Jediism Their continued appeal and success principally in America but gaining wider audience through the 1980s and 1990s is chiefly as a result of underground publishing and the internet This book deals with immensely popular subject matter Jediism developed from George Lucas Star Wars films the Church of the Flying Spaghetti Monster founded by 26 year old student Bobby Henderson in 2005 as a protest against the teaching of Intelligent Design in schools Discordianism and the Church of the SubGenius which retain strong followings and participation rates among college students The Church of All Worlds focus on Gaia theology and environmental issues makes it a popular focus of attention The continued success of these groups of Invented Religions provide a unique opportunity to explore the nature of late post modern religious forms including the use of fiction as part of a bricolage for spirituality identity formation and personal orientation

### **Toward an Islamic Enlightenment**

M. Hakan Yavuz, 2012-12-10 M Hakan Yavuz offers an insightful and wide ranging study of the Gulen Movement one of the most imaginative developments in contemporary Islam Founded in Turkey by the Muslim thinker Fethullah Gulen the Gulen Movement aims to disseminate a moderate interpretation of Islam through faith based education Its activities have fundamentally altered religious and political discourse in Turkey in recent decades and its schools and other institutions have been established throughout Central Asia and the Balkans as well as western Europe and North America Consequently its goals and modus operandi have come under increasing scrutiny around the world Yavuz introduces readers to the movement its leader its philosophies and its practical

applications After recounting Gulen s personal history he analyzes Gulen s theological outlook the structure of the movement its educational premise and promise its financial structure and its contributions particularly to debates in the Turkish public sphere its scientific outlook and its role in interfaith dialogue Towards an Islamic Enlightenment shows the many facets of the movement arguing that it is marked by an identity paradox despite its tremendous contribution to the introduction of a moderate peaceful and modern Islamic outlook so different from the Iranian or Saudi forms of radical and political Islam the Gulen Movement is at once liberal and communitarian provoking both hope and fear in its works and influence

**Sociology and Statistics in Britain, 1833-1979** Plamena Panayotova, 2020-09-28 At the beginning of the twentieth century Britain stood at the forefront of science and statistics and had a long and respected tradition of social investigation and reform But it still did not yet have a science of society When in the early 1900s a small band of enthusiasts got together to address this situation the scene was set for a grand synthesis No such synthesis ever took place and instead

British sociology has followed a resolutely non statistical path Sociology and Statistics in Britain 1833 1979 investigates how this curious situation came about and attempts to explain it from an historical perspective It uncovers the prevalence of a deep and instinctive distrust within British sociology of the statistical methodology and mindset resulting in a mix of quiet indifference and active hostility which has persisted from its beginnings right up to the present day While British sociology has thrived institutionally since the post war expansion of higher education this book asks whether or not it is poorer for having failed to recognise that statistics provides the foundations for the scientific study of society and for having missed opportunities to build upon those foundations Ultimately this important revealing and timely book is about British sociology s refusal to come to grips with a modern scientific way of thinking which no discipline that aspires to an effective study of society can afford to ignore
