science to examine how religion is passed down the generations in six European and North American nations Taking a social change perspective within the context of family socialization theory the authors treat intergenerational change and continuity in religion and spirituality as occurring under specific national and historical conditions As such they consider the social forces that variously reinforce or inhibit transmission of religiosity across successive generations within families The volume provides a nuanced view of the role that societal context plays in religious transitions and transformations Chapters consider the strong influence of the Roman Catholic church in Italy Communist suppression of religion in Hungary aversion to religious discussions in Finland the East West Catholic Protestant divide in Germany and rapid religious deculturation in Canada and the U S Further each chapter takes a mixed methods approach using quantitative survey data to describe the strength and pattern of intergenerational transmission and interview data to clarify family dynamics by which parents and oftentimes grandparents influence the religious beliefs and practices of younger generations taking care to consider how the absence of religion is also conveyed to the next generation
