Religion in the History of the Medieval West John Van Engen, 2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society *Religion in the History of the Medieval West* John H. Sarah Hamilton, 2015-08-12 During the middle ages belief in God was the single more important principle for every person and the all powerful church was the most important institution It is impossible to understand the medieval world without understanding the religious vision of the time and this new textbook offers an approach which explores the meaning of this in day to day life as well as the theory behind it *Church and People in the Medieval West* gets to the root of belief in the Middle Ages covering topics including pastoral reform popular religion monasticism heresy and much more throughout the central middle ages from 900 1200 Suitable for undergraduate courses in medieval history and those returning to or approaching the subject for the first time *Rome and Religion in the Medieval World* Valerie L. Garver, Owen M. Phelan, 2016-04-08 *Rome and Religion in the Medieval World* provides a panoramic and interdisciplinary exploration of Rome and religious culture The studies build upon or engage Thomas F X Noble's interest in Rome especially his landmark contributions to the origins of the Papal States and early medieval image controversies Scholars from a variety of disciplines offer new viewpoints on key issues and questions relating to medieval religious cultural and intellectual history Each study explores different dimensions of

Rome and religion including medieval art theology material culture politics education law and religious practice Drawing upon a wide range of sources including manuscripts relics historical and normative texts theological tracts and poetry the authors illuminate the complexities of medieval Christianity especially as practiced in the city of Rome itself and elsewhere in Europe when influenced by the idea of Rome Some trace early medieval legacies to the early modern period when Protestant and Catholic theologians used early medieval religious texts to define and debate forms of Roman Christianity The essays highlight and deepen scholarly appreciation of Rome in the rich and varied religious culture of the medieval world **Sin:**

Essays on the Moral Tradition in the Western Middle Ages Richard Newhauser,2023-07-28 Richard Newhauser examines here aspects of the moral tradition of medieval thought specifically the construction of the seven deadly sins their offspring and related schematizations of immorality in the Latin West The emphasis in these studies is on the malleability of moral categories their relationship to changes in medieval culture and the creativity and sensitivity of the thinkers who made use of the concepts of sinfulness in the Middle Ages The first section examines the contexts in which the seven deadly sins or nine accessory sins are found in medieval Latin English and German texts and in particular the genre of the treatise on vices and virtues as the major vehicle in which concepts of immorality were examined and presented to a variety of audiences for meditative or pastoral purposes The second section deals with one of the more interesting of the seven deadly sins avarice in its penitential literary apocalyptic and institutional contexts as its definition changed slowly with developing commercial experiences in medieval Europe In the last section the breadth of the concept of a sinful curiosity is examined and its historical development is delineated in the thought of Augustine of Hippo and the early Cistercians **Heresy, Philosophy**

and Religion in the Medieval West Gordon Leff,2024-10-28 The papers in this volume fall into four sections The first part deals more generally with heresy religious movements and the Church while the second focuses on Wyclif covering his path to dissent his religious doctrines and a doctrinal comparison with Hus Philosophical themes come to the fore in the third section which has papers on the decline of scholasticism in the 14th century and on the trivium and also includes hitherto unpublished essays on the theology of Augustine s two cities and on Ockham and nominalism The final part with another two papers published here for the first time discusses Christian Augustinian and Franciscan concepts of man and the concepts of natural rights according to Ockham and the Franciscans **The Fathers and Beyond** Marcia L. Colish,2023-05-31 The

papers in this second selection of articles by Professor Colish focus on thinkers of the patristic age and relate to her three monographic studies in this area published over the last two decades At the same time these papers look beyond the patristic period both backward to these authors appropriation of the classical and Christian traditions and forward to their function as authorities in later medieval intellectual history from the Carolingian Renaissance to Anselm of Canterbury the scholastics and Dante Themes which these papers address include the transmission and use of Platonism and Stoicism logic and linguistic theory and the ethics of lying moral indifference and the salvation of the virtuous pagan *Church and People in*

H. Evans, 2025-08-01 While virtually all early medieval historians wrote about God they did not do so in the same way Rather than taking their comments about God at face value then as has been the case in much work on medieval history writing they are deserving of closer scrutiny with implications not simply for how we understand the key narrative sources for early medieval history but also the cultures in which they originated Seeking to fill this historiographical gap this book explores through the prolific writing of historians in the Carolingian Empire how historians in early medieval societies thought about God and what this meant for themselves and their audiences It argues that although Carolingian historians wrote about God's agency with tremendous literary subtlety while reflecting complex theological ideas and attempting to intervene into challenging political realities in many respects they also broke with the example of early Christian historians from Late Antiquity which demonstrates that writing about God was neither a uniform nor inevitable part of early medieval history writing As well as yielding new insights into the nature of these crucial primary sources this analysis helps to provide an overdue examination of the complex relationship between religion and history writing in early medieval societies The book demonstrates that comments about God cannot be reduced to mere political propaganda or even moralistic encouragements for early medieval Christians to lead better lives Instead it argues that these historians sought to communicate a robust theology of divine activity which was relevant and useful for those involved in the often threatening world of Carolingian public life **Lived Religion and Gender in Late Medieval and Early Modern Europe** Sari Katajala-Peltomaa, Raisa Maria Toivo, 2020-11-23 This study is an exploration of lived religion and gender across the Reformation from the 14th 18th centuries Combining conceptual development with empirical history the authors explore these two topics via themes of power agency work family sainthood and witchcraft By advancing the theoretical category of experience Lived Religion and Gender reveals multiple femininities and masculinities in the intersectional context of lived religion The authors analyse specific case studies from both medieval and early modern sources such as secular court records to tell the stories of both individuals and large social groups By exploring lived religion and gender on a range of social levels including the domestic sphere public devotion and spirituality this study explains how late medieval and early modern people performed both religion and gender in ways that were vastly different from what ideologists have prescribed

Lived Religion and Gender covers a wide geographical area in western Europe including Italy Scandinavia and Finland making this study an invaluable resource for scholars and students concerned with the history of religion the history of gender the history of the family as well as medieval and early modern European history The Introduction chapter of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Motherhood, Religion, and Society in Medieval Europe, 400-1400 Lesley Smith, Conrad Leyser, 2016-04-22 Who can concentrate on thoughts of Scripture or philosophy and be able to endure babies crying Will he put up with the constant muddle and squalor which small children bring into the home The wealthy can do so but philosophers lead a very different life So according to Peter Abelard did his wife Heloise state in characteristically stark terms the antithetical demands of family and scholarship Heloise was not alone in making this assumption Sources from Jerome onward never cease to remind us that the life of the mind stands at odds with life in the family For all that we have moved in the past two generations beyond kings and battles fiefs and barons motherhood has remained a blind spot for medieval historians Whatever the reasons the result is that the historiography of the medieval period is largely motherless The aim of this book is to insist that this picture is intolerably one dimensional and to begin to change it The volume is focussed on the paradox of motherhood in the European Middle Ages to be a mother is at once to hold great power and by the same token to be acutely vulnerable The essays look to analyse the powers and the dangers of motherhood within the warp and weft of social history beginning with the premise that religious discourse or practice served as a medium in which mothers and others could assess their situation defend claims and make accusations Within this frame three main themes emerge survival agency and institutionalization The volume spans the length and breadth of the Middle Ages from late Roman North Africa through ninth century Byzantium to late medieval Somerset drawing in a range of types of historian including textual scholars literary critics students of religion and economic historians The unity of the volume arises from the very diversity of approaches within it all addressed to the central topic

Space in the Medieval West Fanny Madeline, 2016-04-01 In the last two decades research on spatial paradigms and practices has gained momentum across disciplines and vastly different periods including the field of medieval studies Responding to this spatial turn in the humanities the essays collected here generate new ideas about how medieval space was defined constructed and practiced in Europe particularly in France Essays are grouped thematically and in three parts from specific sites through the broader shaping of territory by means of socially constructed networks to the larger geographical realm The resulting collection builds on existing scholarship but brings new insight situating medieval constructions of space in relation to contemporary conceptions of the subject

Church And Society In England 1000-1500 Andrew Brown, 2017-03-14 What impact did the Church have on society How did social change affect religious practice Within the context of these wide ranging questions this study offers a fresh interpretation of the relationship between Church society and religion in England across five centuries of change Andrew Brown examines how the teachings of an increasingly universal Church decisively affected the religious life of the laity in medieval England However by exploring a broad range of religious phenomena both orthodox and heretical including corporate religion and the

devotional practices surrounding cults and saints Brown shows how far lay people continued to shape the Church at a local level In the hands of the laity religious practices proved malleable Their expression was affected by social context status and gender and even influenced by those in authority Yet as Brown argues religion did not function simply as an expression of social power hierarchy patriarchy and authority could be both served and undermined by religion In an age in which social mobility and upheaval particularly in the wake of the Black Death had profound effects on religious attitudes and practices Brown demonstrates that our understanding of late medieval religion should be firmly placed within this context of social change
