**Religion, Community and Development** Gurpreet Mahajan, Surinder S. Jodhka, 2010-06-02 By making religious community a relevant category for discussing development deficit the Sachar Committee Report that was submitted to the Prime Minister of India in 2007 initiated a new political discourse in India While the liberal secular framework privileged the individual over the community and was more inclined to use the category of class rather than the identity of religion the Sachar Committee differentiated citizens on the basis of their religious identity Its conclusions reinforced the necessity of approaching issues of development through the optic of religious community This volume focuses on this shift in public policy The articles in this collection examine the nature and implications of this new approach to the Indian social reality Taking a close look at the findings of the Sachar Committee Report SCR they highlight the challenges posed by inter community comparisons At another level the articles supplement the debate initiated by the SCR by constructing a profile of religious

communities in India so as to factor in their concerns of development into the present discourse and to nuance and modify the simple indicators to which development is often reduced As most religious communities are themselves engaged in development related activities the volume also examines some of these initiatives in order to see what development connotes to the members themselves and what receives attention by the community Students of social sciences and development studies as well as those dealing with issues of marginalization will find this collection an invaluable resource for understanding contemporary India and for undertaking further theoretical and empirical research

**Deconstructing Global Citizenship** Hassan Bashir, Phillip W. Gray, 2015-10-30 The success of individual nation states today is often measured in terms of their ability to benefit from and contribute to a host of global economic political socio cultural technological and educational networks This increased multifaceted international inter dependence represents an intuitively contradictory and an immensely complex situation This scenario requires that national governments whose primary responsibility is towards their citizenry must relinquish a degree of control over state borders to constantly developing trans and multinational regimes and institutions Once state borders become permeable all sorts of issues related to rights earned or accrued due to membership of a national community come into question Given that neither individuals nor states can eschew the influence of the growing interdependence this new milieu is often described in terms of shrinking of the world into a global village This reshaping of the world requires us to broaden our horizons and re evaluate the manner in which we theorize human personhood within communal boundaries It also demands us to acknowledge that the relative decline of Euro American economic and political influence and the rise of Asian and Latin American states at the global level have created spaces in which a de territorialized and a de historicized notion of citizenship and state can now be explored The essays in this volume represent diverse disciplinary analytical and methodological approaches to understand what the implications are

of being a citizen of both a nation state and the world simultaneously In sum Deconstructing Global Citizenship explores the question of whether a synthesis of contradictory national and global tendencies in the term global citizenship is even possible or if we are better served by fundamentally reconsidering our ideas of citizenship community and politics

**Integral Economics** Dr Alexander Schieffer, Professor Ronnie Lessem, 2012-08-28 Why on earth is economics perceived to come in only one or at best two different a cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In Integral Economics Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much
