Religion And Rural Revolt:

Essays on the French Revolution Steven G. Reinhardt, Elisabeth A. Cawthon, 1992 Clarke Garrett examines the differing responses of Catholics and Protestants and the resulting disturbances Roderick Phillips describes the wide variation in provincial response to the revolutionary assembly's family reform measures He traces the different reactions of urban and rural residents to such legal measures as liberalization of divorces secularization of birth death and marriage registrations and inheritance reform Peasants in central France were already engaged in total revolution when Joseph Fouché arrived there in late 1793 Nancy Fitch argues that Fouché was formed by his encounter with indigenous peasant radicalism as much as the peasants were influenced by his rhetoric of a new political culture Donald Sutherland summarizing scholarly debate on the subject argues that in the final analysis the Revolution itself was tragically and profoundly alien to many French men and women in 1789 Catholicism in Britain & France Since 1789 Frank Tallett, 1996-07-01 This volume provides an up to date

analysis of Catholicism in Britain and France examining various aspects of the faith in the 200 years since the French Revolution By focusing on two countries whose religious establishment and experience were markedly different and by adopting a comparative approach the book is able to offer an unusual perspective on the challenges facing the Catholic church in the modern world and on its impact not only on believers but also on the two societies as a whole **The**

The Other Rebellion Eric Van Young, 2002-04-01 Mexico's movement toward independence from Spain was a key episode in the dissolution of the great Spanish Empire and its accompanying armed conflict arguably the first great war of decolonization in the nineteenth century This book argues that in addition to being a war of national liberation the struggle was also an internal war pitting classes and ethnic groups against each other an intensely localized struggle by rural people especially Indians for the preservation of their communities While local and national elites focused their energies on wresting power from colonial authorities and building a new nation state rural people were often much more concerned about keeping village identities and lifeways intact against the forces of state expansion commercialization and modernization Conventional wisdom says that Mexican independence was achieved through a cross class and cross ethnic alliance between creole ideologues military leaders and a mass following This book shows that this is not only an incomplete explanation of what went on in Mexico during the decade of armed confrontation that led to Mexico's independence but also a distortion of Mexican social and cultural history The author delves deeply into life histories previously unexamined texts statistical social profiling and local historical ethnography to examine the dynamics of popular rebellion He focuses especially on Mexico's Indian villages but also considers the role of parish priests as insurgent leaders local conflicts over land politics and religious

Alternate Civilities Robert Paul Weller, 2018-02-19 Alternate Civilities is an anthropologist's answer to the argument that China's cultural tradition renders it incapable of achieving an open political system Robert Weller draws on his knowledge of both China and Taiwan to show how such sweeping claims fail to take account of potential democratic stimuli among local level associations such as business organizations religious groups environmental movements and women's networks These groups were pivotal in Taiwan's democratic transition and they are thriving in the new free space that has opened up in China They do not promise a clone of Western civil society but they do show the possibility of an alternate civility

In the Shadow of War and Empire Görkem Akgöz, 2023-12-14 In the Shadow of War and Empire offers a site specific history of Ottoman and Turkish industrialisation through the lens of a mid nineteenth century cotton factory in the Turkish Manchester the name chosen by the Ottomans for the industrial complex they built in the 1840s in Istanbul which in the contemporary words of one of the country's most prominent contemporary Marxist theorists became the secret to and the basis of Turkish capitalism in the 1930s

Landscapes of Protest in the Scottish Highlands after 1914 Iain J.M. Robertson, 2016-04-15 In November 1918 the implementation of agrarian change

in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes Widespread and varied social protest rapidly followed It argues that previously there has been a failure to capture fully the geography chronology typology and rate of occurrence of these events The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were used which demand attention not least for the fact that these events unlike most of the earlier Land Wars period were successful There are functioning townships in the Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from the bottom up coming increasingly into conflict with conservationist views expressed from the top down It focuses on individual case studies in order to engage more convincingly with an important evidential base that of popular memory of land disturbances and to adopt a frame and lens through which to explore the fluid and contingent nature of protest performances Based upon the belief that in the study of landscapes of social protest the old shibboleth of space as solely passive setting and symbolic register is no longer tenable is paid here to nature culture interactions to vernacular ecological b

Popular Voices in Latin American Catholicism Daniel H. Levine, 2014-07-14 Throughout Latin America observers and activists have found in religion a promise of deep and long lasting democratization But for religion to change culture and politics religion itself must change Such change is not only a matter of doctrine ritual or institutional arrangements but also arises out of the needs values and ideas of average believers Combining rich interviews and community studies in Venezuela and Colombia with analysis of broad ideological and institutional transformations Daniel Levine examines how religious and cultural change begins and what gives it substance and lasting impact The author focuses on the creation of self confident popular groups among hitherto isolated and dispirited individuals Once silent voices come to light as peasants and urban barrio dwellers reflect on their upbringing and community on poverty and opportunity on faith prayer and the Bible and on institutions like state school and church Levine also interviews priests sisters and pastoral agents and explains how their efforts shape the links between popular groups and the larger society The result is a clear understanding of how relations among social and cultural levels are maintained and transformed how programs are implemented why they succeed or fail and how change appears both to elites and to ordinary people Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Shaping History Wayne te Brake, 2023-11-15 As long as there have been governments ordinary people have been acting in a variety of often informal or extralegal ways to influence the rulers who claimed authority over them *Shaping History* shows how ordinary people broke down the institutional and cultural barriers that separated elite from popular politics in sixteenth and seventeenth century Europe and entered fully into the historical process of European state formation Wayne te Brake s outstanding synthesis builds on the many studies of popular political action in specific settings and conflicts locating the interaction of rulers and subjects more

generally within the multiple political spaces of composite states In these states says Te Brake a broad range of political subjects often religiously divided among themselves necessarily aligned themselves with alternative claimants to cultural and political sovereignty in challenging the cultural and fiscal demands of some rulers This often violent interaction between subjects and rulers had particularly potent consequences during the course of the Reformation the Counter Reformation and the Crisis of the Seventeenth Century But as Te Brake makes clear it was an ongoing political process not a series of separate cataclysmic events Offering a compelling alternative to traditionally elite centered accounts of territorial state formation in Europe this book calls attention to the variety of ways ordinary people have molded and shaped their own political histories As long as there have been governments ordinary people have been acting in a variety of often informal or extralegal ways to influence the rulers who claimed authority over them Shaping History shows how ordinary people broke down the institution
