Selected Readings in the Anthropology of Religion Stephen D. Glazier, Charles A. Flowerday, 2003-12-30 Brings

together in one volume a number of key theoretical and methodological advances in the anthropological study of religion. Chapters cover important topics not ordinarily included in books dealing with the anthropology of religion e.g. bipedalism, the study of alcohol, film and video, images, notions of religious agency. In addition, this collection is intended to build bridges between anthropologists of religion and religious studies scholars. Over the last four decades, anthropologists have grappled with the dialectical relationship between the examination of cultures from the emic or insider perspective and the etic or outsider perspective. Nowhere is this creative tension more evident than in the anthropological study of religion. In this volume, anthropologists and religious studies scholars come to terms not only with a landscape that has shifted fundamentally but a landscape that is still shifting. Essays in this collection raise new and important issues for the anthropological study of religion in new and important ways. In intensely personal essays, a number of contributors address two fundamental concerns in the study of religion: 1. how should anthropologists deal with the beliefs and practices of others, and 2. how should anthropologists deal with their own religious backgrounds and beliefs as these may affect their understanding of the beliefs and practices of others. A partial resolution to both questions is necessary before the anthropological study of religion can advance to a higher level. *Epistemologies and the Limitations of Philosophical Inquiry* Deepak Sarma, 2005. This work contributes to the ongoing controversies regarding epistemic authority and voice in religious studies. BOOK JACKET

India Once Ruled the Americas! Gene D. Matlock, 2000-12. The people of India have long known that their ancestors once sailed to and settled in the Americas. They called America Patala, The Under World, not because they believed it to be underground but because the other side of the globe appeared to be straight down. Now at last many mysteries about Ancient America, such as the identity of the Mexican Quetzalcoatl, the true origins of our Native American etc., will be cleared up once and for all. Divine Sounds from the Heart—Singing Unfettered in their Own Voices Rekha Pande, 2010-09-13. Recent years have seen a sea change in the way history is written and also in the way our conceptions of the past are being rewritten. In traditional historiography, women's articulation is often marginalized and dominated by male voices. Through centuries of patriarchal control, women negotiated many layers and levels of existence, working out different forms of resistance which have often gone unnoticed. Bhakti was one such medium. Religion provided the space in the medieval period, and women saints embraced bhakti to define their own truths in voices that question society, family, and relationships. For all these women bhaktas, the rejection of the male power that they were tied to in subordinate relationship became the terrain for struggle, self-assertion, and alternative seeking. Most of these women lived during the period from 12th to 17th Century. While the dominant mode of worship in bhakti was prostration to a deity like a feudal lord, the women bhaktas' idea of God as a lover, a husband, and a friend came as a breath of fresh air. The individual outpourings and the voices of these women, who had the courage to sing unfettered in their own voices, refused to melt in the din of the feudal scene which was largely patriarchal. This book will be useful to scholars interested in Feminist History, Comparative Religion, and Asian Studies. The sensitive and rigorous

research will be of great help to young scholars interested in embarking on a journey to discover religious history especially with regards to women's history in the South Asian context

Work, Word and the World Susan Visvanathan, 2022-07-30

Word Work and the World begins with the assumption that people are interested in the world around them. The book is written with the intent of drawing in lay and specialised readers into the interdisciplinary world of Sociology, Social Anthropology. The methods of both since the 1960s have been seen as combined for the reasons that the dichotomy of tribal peasant in relation to urban conglomerations is thought to be immensely interesting to the reading public. Migration for work is so significant whether within the country or outside that the dilemmas and concerns of the diaspora are always interesting data. Put simply the book tries to bring forward the living practices of communities which are interlocked in time and space where work and their cultures become intermeshed in different ways. Of course cyberspace becomes the common denominator in understanding that people are interested in one another; families and friends become interactive over spans of time which allow a certain intimacy of acknowledgement. Economic practices are also embedded in the hinterland of communication. As the world becomes increasingly vulnerable to climate change, organic farming, the search for water, the protection of lands and people from floods are all real indexes of how urgent the task of recording people's life worlds has become. Narrative production and its interpretation draws us into the complexities of the ethnographic present which as a type of documentation provides resource materials to historians. Since the world is now so encompassable, the book explores how human beings remember the past while creating new niches for the survival of their families and communities. Hybridization of cultures also involves familiarity with world literature because people enjoy the expanse of imagination into which they are released by reading time honoured texts whether of the ancient past or of contemporary time. The time of legend or fable of coercive patterns of existence arising out of natural or political calamities makes them ever more respectful of traditions and the hope for survival. Out of war and loss arise both science and poetry, not necessarily opposed to one another. This book tries to bring to the reader the pleasures of many cultures in conversation with one another where dissonances may be accommodated.

Women in India Sita Anantha Raman, 2009-06-08

Are Indian women powerful mother goddesses or domestic handmaidens trailing behind men in literacy, wages, opportunities and rights? Have they been agents of their own destinies or voiceless victims of patriarchy? Behind these colorful oversimplifications lies the reality of many feminine personas belonging to various classes, ethnicities, religions and castes. This two volume set looks at Indian history from ancient to modern times, revealing precisely why ideas of gender rights were not static across eras or regions. Raman's work is a reflection on the various ways in which women in a non-Western culture have developed and expressed their own feminist agenda.
