theological implications The New History Alun Munslow, 2016-09-17 The notion of history has always been one strenuously debated by both academics and the wider population This deeply provocative re thinking of our engagement with the past by one of the world s leading post modern historians takes that debate one step further Alun Munslow re assesses history in the light of post modernism and other intellectual challenges which have questioned the primacy of the modernist epistemology of empiricism In an original and stimulating vision of history that will intrigue all those seriously interested in the subject Munslow argues that history is not only about the sources but a literary construction Munslow concludes that history as a cultural narrative about the past can never tell us what the past really means This far reaching conclusion is based on the radical idea that the content of history is defined as much by the nature of the language used to represent and interpret that content as it is by research into the sources This suggests that history does not produce the most likely meaning of the past but rather can only generate alternative meanings The lead volume in a major new series on historical thinking and practice this is an accessible yet absorbing study that breaks new ground in discussing the stage history is at now and perhaps most engagingly the direction it will take in the future *American Patroness* Katherine Dugan, Karen E. Park, 2024-01-02 A vital collection of interdisciplinary essays that illuminates the significance of Marian shrines and promises to teach scholars how to read them for decades to come *American Patroness* Marian Shrines and the Making of US Catholicism is a collection of twelve essays that examine the historical and contemporary roles of Marian shrines in US Catholicism The essays in this collection use historical ethnographic and comparative methods to explore how Catholics have used Marian devotion to make an imprint on the physical and religious landscape of the United States Using the dynamic malleability of Marian shrines as a starting place for studying US Catholicism each chapter reconsiders the American religious landscape from the perspective of a single shrine to Mary and asks What does this shrine reveal about US Catholicism and about American religion Each of the contributors in *American Patroness* examines why and how Marian shrines persist in the twenty first century and subsequently uses that examination to re read contemporary US Catholicism Because shrines are not neutral spaces they reflect and shape the elastic yet strict boundaries of what counts as Catholic identity and who controls prayer practices the studies in this collection also shed light on the contested dynamics of these holy sites *American Patroness* demonstrates that Marian shrines continue to be places where an American Catholic identity is continuously worked on negotiations about power occur and Marian relationships are fostered and nurtured in spaces that are simultaneously public and intimate **Religion and Revelation after Auschwitz** Balázs M.
