**Ancestor Worship and the Elite in Late Iron Age Scandinavia** Triin Laidoner, 2020-01-14 Ancestor worship is often assumed by contemporary European audiences to be an outdated and primitive tradition with little relevance to our societies past and present This book questions that assumption and seeks to determine whether ancestor ideology was an integral part of religion in Viking Age and early medieval Scandinavia The concept is examined from a broad socio anthropological perspective which is used to structure a set of case studies which analyse the cults of specific individuals in Old Norse literature The situation of gods in Old Norse religion has been almost exclusively addressed in isolation from these socio anthropological perspectives The public gravemound cults of deceased rulers are discussed conventionally as cases of sacral kingship and more recently religious ruler ideology both are seen as having divine associations in Old Norse scholarship Building on the anthropological framework this study introduces the concept of superior ancestors employed in social anthropology to denote a form of political ancestor worship used to regulate

social structure deliberately It suggests that Old Norse ruler ideology was based on conventional and widely recognised religious practices revolving around kinship and ancestors and that the gods were perceived as human ancestors belonging to elite families
