A History of Religion East and West Trevor Ling, 1969-01-15 The religious traditions of Asia and Europe the East and West of the title are sometimes regarded as being in sharp contrast with each other the one mystical the other prophetic Whenever their religions are not so contrasted they are usually treated in isolation from each other the religion of Israel Zoroastrianism Judaism Christianity Hinduism Jainism and Buddhism Dr Ling however stresses that there is considerable overlap and interpenetration between the two types and areas and that it is important to see the historical inter relation between these religions and to observe how during given periods of history there are parallel developments or significant divergences He covers the period 1500 B C to the present time providing an outline of the development of Asian and European religious traditions and institutions and discussing the social and economic factors involved in the development of religious traditions although he shows that such factors alone do not account for the religious life of man Dr Ling goes on to interpret the contemporary significance of these religions and their potential for the future life of humanity He suggests that the present stage of religious advance is characterised by open endedness towards the future not all religions exhibit this character but none has yet exhausted the possibilities of development This book is intended for use as an introduction to the study of religion Although reference is made in the text to sources of further information the book can be used without reference to

them Religion in the Modern American West Ferenc Morton Szasz, 2002-01-01 When Americans migrated west they carried with them not only their hopes for better lives but their religious traditions as well Yet the importance of religion in the forging of a western identity has seldom been examined In this first historical overview of religion in the modern American West Ferenc Szasz shows the important role that organized religion played in the shaping of the region from the late nineteenth to late twentieth century He traces the major faiths over that time span analyzes the distinctive response of western religious institutions to national events and shows how western cities became homes to a variety of organized faiths that cast only faint shadows back east While many historians have minimized the importance of religion for the region Szasz maintains that it lies at the very heart of the western experience From the 1890s to the 1920s churches and synagogues created institutions such as schools and hospitals that shaped their local communities during the Great Depression the Latter day Saints introduced their innovative social welfare system and in later years Pentecostal groups carried their traditions to the Pacific coast and Southern Baptists among others set out in earnest to evangelize the Far West Beginning in the 1960s the arrival of Asian faiths the revitalization of evangelical Protestantism the ferment of post Vatican II Catholicism the rediscovery of Native American spirituality and the emergence of New Age sects combined to make western cities such as Los Angeles and San Francisco among the most religiously pluralistic in the world Examining the careers of key figures in western religion from Rabbi William Friedman to Reverend Robert H Schuller Szasz balances specific and general trends to weave the story of religion into a wider social and cultural context Religion in the Modern American West calls attention to an often overlooked facet of regional history and broadens our understanding of the American experience **Religion and the Specter of the West** Arvind-Pal S. Mandair, 2009-10-23 Arguing that intellectual movements such as deconstruction postsecular theory and political theology have different implications for cultures and societies that live with the debilitating effects of past imperialisms Arvind Mandair unsettles the politics of knowledge construction in which the category of religion continues to be central Through a case study of Sikhism he launches an extended critique of religion as a cultural universal At the same time he presents a portrait of how certain aspects of Sikh tradition were reinvented as religion during the late nineteenth and early twentieth centuries India s imperial elite subtly recast Sikh tradition as a sui generis religion which robbed its teachings of their political force In turn Sikhs began to define themselves as a nation and a world religion that was separate from but parallel to the rise of the Indian state and global Hinduism Rather than investigate these processes in isolation from Europe Mandair shifts the focus closer to the political history of ideas thereby recovering part of Europe s repressed colonial memory Mandair rethinks the intersection of religion and the secular in discourses such as history of religions postcolonial theory and recent continental philosophy Though seemingly unconnected these discourses are shown to be linked to a philosophy of generalized translation that emerged as a key conceptual matrix in the colonial encounter between India and the West In this riveting study Mandair demonstrates how this philosophy of translation continues to

Malone, 1983 Defending the West Ibn Warraq, 2010-06-03 This is the first systematic critique of Edward Said's influential work *Orientalism* a book that for almost three decades has received wide acclaim voluminous commentary and translation into more than fifteen languages Said's main thesis was that the Western image of the East was heavily biased by colonialist attitudes racism and more than two centuries of political exploitation Although Said's critique was controversial the impact of his ideas has been a pervasive rethinking of Western perceptions of Eastern cultures plus a tendency to view all scholarship in Oriental Studies as tainted by considerations of power and prejudice In this thorough reconsideration of Said's famous work Ibn Warraq argues that Said's case against the West is seriously flawed Warraq accuses Said of not only willfully misinterpreting the work of many scholars but also of systematically misrepresenting Western civilization as a whole With example after example he shows that ever since the Greeks Western civilization has always had a strand in its very makeup that has accepted non Westerners with open arms and has ever been open to foreign ideas The author also criticizes Said for inadequate methodology incoherent arguments and a faulty historical understanding He points out not only Said's tendentious interpretations but historical howlers that would make a sophomore blush Warraq further looks at the destructive influence of Said's study on the history of Western painting especially of the 19th century and shows how once again the epigones of Said have succeeded in relegating thousands of first class paintings to the lofts and storage rooms of major museums An extended appendix reconsiders the value of 18th and 19th century Orientalist scholars and artists whose work fell into disrepute as a result of Said's work
