without any redundant material      Wealth, Poverty, and Human Destiny Doug Bandow, David Schindler, 2014-05-06 The rapid spread of the liberal market order across the globe poses a host of new and complex questions for religious believers indeed for anyone concerned with the intersection of ethics and economics Is the market economy particularly as it affects the poor fundamentally compatible with Christian moral and social teaching Or is it in substantial tension with that tradition In Wealth Poverty and Human Destiny editors Doug Bandow and David L Schindler bring together some of today s leading economists theologians and social critics to consider whether the triumph of capitalism is a cause for celebration or concern Michael Novak Richard John Neuhaus Max Stackhouse and other defenders of democratic capitalism marshal a number of arguments in an attempt to show that among other things capitalism is more Christian in its foundation and consequences than is conceded by its critics that as Stackhouse and Lawrence Stratton write the roots of the modern corporation lie in the religious institutions of the West and that as Novak contends globalization is the natural ecology of Christianity The critics of liberal economics argue on the other hand that it is historically and theologically shortsighted to consider the global capitalist order and the liberalism that sustains it as the only available option Any system which has as its implicit logic that stable and preserving relationships among people places and things do not matter and are of no worth in the words of Wendell Berry should be regarded with grave suspicion by religious believers and all men and women of goodwill Bandow and Schindler take up these arguments and many others in their responses which carefully consider the claims of the essayists and thus pave the way for a renewed dialogue on the moral status of capitalism a dialogue only now re emerging from under the Cold War rubble The contributors fresh insightful examinations of the intersection between religion and economics should provoke a healthy debate about the intertwined issues of the market globalization human freedom the family technology and democracy      Religion, Wealth and Poverty James V. towards the understanding the relationships between religions and development studies policy and practice It guides readers through current debates presenting explaining and critically evaluating a broad range of literature and locating it within a theoretical context The text explores the role of religion within development from positive contributions such as the important role that many faith based organizations play in education or health care to more complicated and contested notions of impact such as religiously inspired violence or gender inequality The book begins with three background chapters outlining the relevance of religions for development studies policy and practice and introducing the reader to the study of development and of religions Following these the focus then shifts to examine a number of thematic areas including religion gender and development and the implications of the rise of religion for mainstream development studies policy and practice in the 21st century Each chapter contains a range of features to assist undergraduate learning including learning objectives for each chapter discussion of key concepts summaries discussion questions further reading and websites The book also contains over sixty boxed case studies to provide further definition explanation and examples of the interactions between religions and development globally This innovative text presents religions as something that can both obstruct and aid development encouraging readers to engage critically with the multiple ways that religion impacts on both the conceptualization of development as well the resulting project interventions This will be of interest to undergraduate postgraduate students and scholars interested in religious studies development studies and the broader study of societies and cultures

Africa's Social and Religious Quest Randee Ijatuyi-Morphé, 2014-01-30 This well crafted book probes the key dimensions of Africa's existential predicament It constitutes an intellectual response to a gnawing African situation the starting point for grasping Africa's social and religious quest Beyond split explanations of external versus internal factors e.g. colonization slavery vs leadership cultural values this study accounts more comprehensively for emergent issues shaping this situation The situation reflects a gamut of problems in traditional African religion and material culture which hitherto defines African communality politics and destinies vis vis the cosmos and nature Thus African religion and communities each with its own attendant values do not operate by critical engagement with larger issues of society and civilization especially those shaped by the advent of post modernity Rather they operate via adaptation The communal drive for natural and social harmony inevitably produces a preservationist view of culture leaving things as they are This study takes an integrative approach to religion society and civilization eschews dichotomies and broadly defines and re signifies life and wholeness as a true end of Africans quest today
