Religious Architecture in Louisiana Robert Heck, Otis B. Wheeler, 1996-01-01 An enormous number of churches and other religious structures have been built in Louisiana over the past 250 years many of which still stand Today in New Orleans alone there are more than 850 churches representing more than seventy denominations The state s religious buildings encompass not only a wide range of faiths but also a striking diversity of architectural forms In Religious Architecture in Louisiana author Robert W Heck and photographer Otis B Wheeler provide the first photographic survey of this rich architectural heritage Their goal has been not to document every religious building in the state a nearly impossible task but to isolate prime examples of the historically and architecturally significant Robert W Heck presents a brief history of Louisiana s religious architecture He describes the dominating influence of Catholicism during the eighteenth century during which time the original Church of St Louis was built on the site of the present Cathedral of St Louis King of France in New Orleans He then discusses the burgeoning construction that accompanied the expansion of religious freedom following the Louisiana Purchase in 1803 as Protestants and Jews erected their own places of worship The author also considers the various architectural influences that have marked Louisiana s religious buildings from the Colonial style of the eighteenth century to the Classical Revival and Gothic Revival styles that predominated during the middle part of the nineteenth century to the Eclectic style that gained currency after the Civil War and persisted until about 1930 The great part of the book is devoted to 162 religious buildings located throughout the state In addition to presenting photographs of the structures each place of worship is identified by name address date of construction when known and architectural style For each building the author also provides comments on design construction materials and structural and decorative details To enhance the usefulness of the book a glossary of architectural terms and an appendix that lists those religious buildings in the state included in the National Register of Historic Places is included as well as another appendix that lists known early religious structures that are no longer standing Religious Architecture in Louisiana will prove a valuable resource for architects

Religious Heritage Anne Fornerod,2016-03-09 This collection brings together a group of highly respected law and religion scholars to explore the funding of religious heritage in the context of state support for religions The importance of this state support is that on the one hand it illustrates the potential tensions between secular and religious values whilst on the other it constitutes a relevant tool for investigating the question of the legitimacy of such financial support The funding logically varies according to the national system of state religion relationships and this is reflected in the range of countries studied including Belgium Bulgaria Denmark France Italy The Netherlands Spain Turkey and the United Kingdom The book provides clarity in the assignment of funds to religious heritage as well as seeking to define the limit of what relates to the exercise of worship and what belongs to cultural policy It is clear that the main challenge for the future lies not only in managing the

dual purpose of religious monuments but also in re using these buildings which have lost their original purpose This collection will appeal to those interested in cultural heritage management as well as law and religion scholars The views expressed during the execution of the RELIGARE project in whatever form and or by whatever medium are the sole responsibility of the authors The European Union is not liable for any use that may be made of the information contained therein
