Handbook of Religious Education is the first book to comprehensively address the range of ways that major countries around the world teach religion in public and private educational institutions. It discusses how three models in particular seem to dominate the landscape. Countries with strong cultural traditions focused on a majority religion tend to adopt an identification model where instruction is provided only in the tenets of the majority religion, often to the detriment of other religions and their adherents. Countries with traditions that differentiate church and state tend to adopt a separation model, thus either offering instruction in a wide range of religions or in some cases teaching very little about religion intentionally, leaving it to religious institutions and the home setting to provide religious instruction. Still other countries attempt managed pluralism in which neither one nor many but rather a limited handful of major religious traditions are taught. Inevitably, there are countries which do not fit any of these dominant models, and the range of methods touched upon in this book will surprise even the most enlightened reader. Religious instruction by educational institutions in 53 countries and regions of the world are explored by experts native to each country. These chapters discuss legal parameters in terms of subjective versus objective instruction in religion, constitutional, statutory, social and political contexts to religious approaches, distinctions between the kinds of instruction permitted in elementary and secondary schools versus what is allowed in institutions of higher learning, regional assessments which provide a welcome overview and comparison. This comprehensive and authoritative volume will appeal to educators, scholars, religious leaders, politicians, and others interested in how religion and education interface around the world.

Shaping the Society Christianity and Culture Pastor Stephen

Kyeyune, 2012-05-03 African theology involves theology that reflects the original thinking of African people. Many Africans have expressed a need for the theology that reflects the original thinking of African peoples. Some theologians have recklessly labeled every aspect of African culture to be evil, whereas others have expressed contempt regarding Christianity wrapped in Europeans' culture. Having stayed away from my culture for more than twenty years, I have encountered several cultural shocks. My personal experience has induced me to invest time into intensive researching on the issue of culture and Christianity in anticipation to help somebody puzzled and drowned in confusion. I mean somebody who will not draw a dividing line between the two aspects of lives. Within every cultural background setting, there is a godly culture that is not in conflict with Christianity. The culture of man apart from God equals to corruption. God created culture, and He sent His Son to restore and to preserve the moral values of the cultures. The godly culture of man should therefore not be in conflict with the culture of the Bible. This topic has been produced in a series of teachings in different volumes of books for deeper clarification. I advise you to read all of the series available for your spiritual growth.

Multicultural Education Farideh Salili, Rumjahn Hoosain, 2006-05-01 The National Association for Multicultural Education in Washington D C listed a number of issues that the school curriculum should address with reference to multicultural education, including racism, sexism, classism, linguisticism, ableism, ageism, heterosexism, and religious intolerance. It is noteworthy

that of all these issues religion is about the only one that throughout history people are willing to die for although whether what is at issue is really religion or other things such as territory is another matter It is also interesting that all the others have isms in their names but religious issues are characterized by intolerance Perhaps we should try to understand this intolerance and look at what steps might help to alleviate it However while intolerance might seem a simple thing understanding what is behind it and how it plays such a crucial role in religion requires what we refer to in the Introduction chapter as a multifaceted approach at multiple levels It is not enough just to try to dispel stereotypes of followers of other religions or to point out commonalities in world religions We should for example try to understand and appreciate how adherents of other religions try to answer questions regarding their adaptation to the contemporary environment It is through understanding how different religions coexist side by side at various levels that we truly come to learn about religion in multicultural education
