Religious Legal Traditions, International Human Rights Law and Muslim States Kamran Hashemi, 2008 This book offers an exploration of aspects of the subject Islam and Human Rights which is the focus of considerable scholarship in recent years predominantly from Western scholars Thus it is interesting and important to have the field addressed from a non Western perspective and by an Iranian scholar The study draws on Persian language literature that addresses both theological and legal dimensions of the theme The work is also distinctive in that it tackles three areas that have been largely ignored in the literature It undertakes a comparative study of the laws of several Muslim States with respect to religious freedom minorities and the rights of the child The study offers an optimistic vision of the fundamental compatibility of Islam and international human rights standards **Islam, Europe and Emerging Legal Issues** W. Cole Durham, Rik

Torfs, 2016-05-06 Islam Europe and Emerging Legal Issues brings together vital analysis of the challenges that Europe poses for an expanding Islam and that Islam poses for Europe within their ever evolving religious legal and social environments This book gathers some of the best thinking on Islam and the law affecting current and contested issues that can no longer be ignored particularly as they have found their way before the European Court of Human Rights Contributors include leading authorities who are working at the heart of this generation s law and religion questions in Europe and across the world This book outlines implications for all those who look to Europe from both within and without for models of human rights implementation and multi cultural accommodation *Religious Rules, State Law, and Normative Pluralism - A*

Comparative Overview Rossella Bottoni, Rinaldo Cristofori, Silvio Ferrari, 2016-07-07 This book is devoted to the study of the interplay between religious rules and State law It explores how State recognition of religious rules can affect the degree of legal diversity that is available to citizens and why such recognition sometime results in more individual and collective freedom and sometime in a threat to equality of citizens before the law The first part of the book contains a few contributions that place this discussion within the wider debate on legal pluralism While State law and religious rules are two normative

systems among many others the specific characteristics of the latter are at the heart of tensions that emerge with increasing frequency in many countries The second part is devoted to the analysis of about twenty national cases that provide an overview of the different tools and strategies that are employed to manage the relationship between State law and religious rules all over the world *Law and Religion in the 21st Century* Rinaldo Cristofori, Silvio Ferrari, 2016-04-15 This book brings together leading international scholars of law and religion to provide an overview of current issues in State religion relations The first part of the collection offers a picture of recent developments in key countries and regions The second part is focused on Europe and in particular on the Nordic States and the post communist countries where State religion systems have undergone most profound change The third and final part is devoted to four issues that are currently debated all over the world the relations between freedom of expression and freedom of religion proselytism and the right to change religion the religious symbols and the legal status of Islam in Europe and Canada The work will be a valuable resource for academics students and policy makers with an interest in the interaction between law and religion **Religious Conversion** M. P. Raju, 1999 **Religious Freedom and Mass Conversion in India** Laura Dudley Jenkins, 2019-04-11 Hinduism is the largest religion in India encompassing roughly 80 percent of the population while 14 percent of the population practices Islam and the remaining 6 percent adheres to other religions The right to freely profess practice and propagate religion in India s constitution is one of the most comprehensive articulations of the right to religious freedom Yet from the late colonial era to the present mass conversions to minority religions have inflamed majority minority relations in India and complicated the exercise of this right In *Religious Freedom and Mass Conversion in India* Laura Dudley Jenkins examines three mass conversion movements in India among Christians in the 1930s Dalit Buddhists in the 1950s and Mizo Jews in the 2000s Critics of these movements claimed mass converts were victims of overzealous proselytizers promising material benefits but defenders insisted the converts were individuals choosing to convert for spiritual reasons Jenkins traces the origins of these opposing arguments to the 1930s and 1940s when emerging human rights frameworks and early social scientific studies of religion posited an ideal convert an individual making a purely spiritual choice However she observes that India s mass conversions did not adhere to this model and therefore sparked scrutiny of mass converts individual agency and spiritual sincerity Jenkins demonstrates that the preoccupation with converts agency and sincerity has resulted in significant challenges to religious freedom One is the proliferation of legislation limiting induced conversions Another is the restriction of affirmative action rights of low caste people who choose to practice Islam or Christianity Last incendiary rumors are intentionally spread of women being converted to Islam via seduction *Religious Freedom and Mass Conversion in India* illuminates the ways in which these tactics immobilize potential converts reinforce damaging assumptions about women lower castes and religious minorities and continue to restrict religious freedom in India today *State Management of Religion in Indonesia* Myengkyo Seo, 2013-07-18 Although Indonesia is generally considered to be a Muslim state and is

indeed the world's most populous Muslim majority nation it has a sizeable Christian minority as a legacy of Dutch colonialism with Christians often occupying relatively high social positions This book examines the management of religion in Indonesia It discusses how Christianity has developed in Indonesia how the state though Muslim in outlook and culture is nevertheless formally secular and how the principal Christian church the Java Christian Church has adapted its practices to fit local circumstances It examines religious violence and charts the evolution of the state's religious policies analysing in particular the impact of the 1974 Marriage Law showing how it enabled extensive state regulation but how in practice rather than reinforcing religious divisions inter religious marriage involving the conversion of one party is widespread Overall the book shows how Indonesia is developing its own brand of secularism neither a full blooded Islamic state like Saudi Arabia nor an outright secular state like Turkey

[Routledge Handbook of Religious Laws](#) Silvio Ferrari, Rossella Bottoni, 2019-04-09 Much has been written on specific religious legal systems yet substantial comparative studies that strive to compare systems identifying their analogies and differences have been relatively few This absence undermines the capacity to understand religions and becomes particularly serious when the faithful of these religions live together in the same geographical space as happens today with increasing frequency Both interreligious dialogue and dialogue between States and religions presuppose a set of data and information that only comparative research can provide This book seeks to address this gap in the literature by presenting a comparative analysis of Christian Jewish Islamic and Hindu laws and traditions Divided into five parts the first part of the book offers the historical background for the legal analysis that is developed in the subsequent parts Part II deals with the sources of law in the four religions under discussion Part III addresses the dynamics of belonging and status and Part IV looks at issues relating to the conclusion of marriage and its dissolution The fifth and final part discusses how each religion views the legal other Each part concludes with exploring what we can learn from a comparative examination of the topic that is dealt with in that part Written by leading experts in the field this book presents a clear and comprehensive picture of key religious legal systems along with a substantial bibliography It provides a state of the art overview of scholarship in this area accompanied by a critical evaluation As such it will be an invaluable resource for all those concerned with religious legal systems
