Religious Education in German Schools Ernst C. Helmreich, 1990-03 *German Elementary Education from 1890 to 1945* Katharine Kennedy, 2025-09-01 In this innovative analysis of German elementary education Katharine Kennedy uses textbooks curricula and pedagogical texts to trace continuities and changes in the lessons taught in the elementary schools of Wilhelmine Weimar and Nazi Germany Children in all three periods were exposed to recurring texts that reinforced attachment to God region and fatherland However they also encountered evolving symbols of the nation and shifting ideas about the identity of Germany and the German people By blending lessons on Hitler race and heredity with traditional narratives Nazi education conveyed its ideology under the cloak of virtue patriotism and normality It provides a compelling example of how a dictatorship manipulates religion and tradition to legitimize a brutal lawless and racist regime The Transformation of German Jewry, 1780-1840 David Sorkin, David Jan Sorkin, 1999 This study analyzes the transformation of German Jewry in the period from 1780 1840 in order to explain why the nature of the most visible Jewry in modern Europe remained essentially invisible to its own members and to subsequent generations German Jewry was the most visible of the modern European Jewries because in its history all of the hallmarks of modernity seemed to have converged in their fullest and most volatile forms The Transformation of German Jewry 1780 1840 thoroughly explores this period of time when large numbers of Jews were integrated into a non Jewish society Sorkin examines the revolution of German Jewry through the study of journals sermons novels and theological popularizations that constituted this new German Jewish public sphere This study may also be applied beyond the confines of Jewish history for it is a study in the afterlife of the German Enlightenment the Aufkl rung in the culture of liberalism **German History from the Margins** Neil Gregor, Nils Roemer, Mark Roseman, 2006-06-14 German History from the Margins offers new ways of thinking about ethnic and religious minorities and other outsiders in modern German history Many established paradigms of German history are challenged by the contributors new and often provocative findings including evidence of the striking cosmopolitanism of Germany s 19th century eastern border communities German Jewry s sophisticated appropriation of the discourse of tribe and race the unexpected absence of antisemitism in Weimar s campaign against smut the Nazi embrace of purportedly Jewish sexual behavior and post war West Germany s struggles with ethnic and racial minorities despite its avowed liberalism Germany s minorities have always been active partners in defining what it is to be German and even after 1945 despite the legacy of the Nazis murderous destructiveness German society continues to be characterized by ethnic and cultural diversity *Religious Human Rights in Global Perspective* John Witte, Johan D. van der Vyver, 2023-07-24 In this Dickensian century of human rights the world has cultivated the best of religious rights protections but witnessed the worst of religious rights abuses In this volume Jimmy Carter John T Noonan Jr and a score of leading jurists assess critically and comparatively the religious rights laws and practices of the international community and of selected states in the Atlantic continents This volume and its companion

Religion and Educational Research David Käbis, 2019 Religious education is always a local or regional practice This is evident in the studies in the present volume on religion and education The production and the transfer of knowledge in this field are particular and take place in certain historical contexts so that both can be understood as historical processes With regard to these theoretical assumptions the authors of the present volume deliver case studies concerning religious education research in Germany Ireland Sweden Argentina as well as other countries Several questions from these contributions might be relevant for further studies Is religion being underrated in educational research Is education on the other hand being underrated in religious studies Do these questions depend on national traditions in educational as well as religious research Are there transnational exchanges between countries through networks guilds and media And finally what might be the additional benefits of such research compared to international comparative studies
