Methods of Private Religious Living Henry Nelson Wieman, 1929 *The Christian Century*, 1928 *International Journal of Religious Education*, 1926 The Transition, Initiated by Copernicus and Galileo, from Religion to Science
Lawrence Wood, 2017-07-06 Have you ever wondered Why two diametrically opposite explanations of ourselves Religion and Science coexist As this book explains the reason is one explanation began before the other The first explanations development began thousands of years ago when our gradually evolving brains and minds awoke to an unknown possibly threatening environment Unfortunately attempts to explain this strange environment were frustrated by illusions such as the apparent motion of the sun moon and stars around the earth which clouded our limited observational capability such as our inability detect constant motion thwarting the developing human minds ability to correctly explain observations These limitations ultimately led to a totally incorrect explanation we reside in a very small young unchanging universe revolving about us created by a supernatural being God a belief system termed Religion About 500 years ago the formulation of the second explanation was initiated when astute investigators such as Copernicus and Galileo using improved new observation instruments such as the telescope and microscope began to realize the existing illusion based religious explanations could not possibly be correct Author Lawrence Wood introduces the brilliant investigators who resolved the illusions by developing radically new explanations of the illusions an explanation system termed Science many still cannot accept hence the coexistence of religion and science If you are one of those trying to bridge the gulf between your religious beliefs which have become increasingly difficult to accept and the strange new world of science this book will help you immeasurably

Religious Syncretism Eric Maroney, 2006-05-25 Even a quick scan of today's headlines makes clear that the growth of fundamentalist versions of Islam is having a vast impact on our world For Americans the rise of Christian fundamentalism especially the Evangelical movement is also socially and politically shaping the country as debates about abortion stem cell research and other important issues are often driven by fundamentalist notions In profound ways orthodox versions of

Judaism have altered the fabric of Middle Eastern politics through the Israeli Palestinian conflict especially regarding settlements in Gaza and the West Bank making peace there all the more difficult and further destabilizing an already unstable region The rise of fundamentalism in the three monotheistic faiths is fully examined in this textbook It is not about fundamentalism however it is about its opposite trend religious syncretism Syncretism describes the phenomenon of one religion borrowing elements from another and it is part of religion that fundamentalists will seldom acknowledge This textbook explores Judaism Christianity and Islam using compelling examples of how syncretism works and looks to show how these three religions have adopted customs and conceptions of other religions most often acquiring practices from pagan predecessors and neighbours The book shows how these three faiths despite how modern media would have us believe have been willing at various times and places to borrow
