The Great Powers and the European States System 1814-1914 Roy Bridge, Roger Bullen, 2014-01-14 This book illuminates in the form of a clear well paced and student friendly analytical narrative the functioning of the European states system in its heyday the crucial century between the defeat of Napoleon in 1814 and the outbreak of the First World War just one hundred years later In this substantially revised and expanded version of the text the author has included the results of the latest research a body of additional information and a number of carefully designed maps that will make the subject even more accessible to readers *Haig and Kitchener in Twentieth-Century Britain* Stephen Heathorn, 2016-04-22 Lord Kitchener and Lord Haig are two monumental figures of the First World War Their reputations both in their lifetimes and after their deaths have been attacked and defended scrutinized and contested They have been depicted in film print and public memorials in Britain and the wider world and new biographies of both men appear to this day The material representations of Haig and Kitchener were shaped used and manipulated for official and popular ends by a variety of groups at different times during the twentieth century The purpose of this study is not to discover the real individual nor to attack or defend their reputations rather it is an exploration of how both men have been depicted since their deaths and to consider what this tells us about the nature and meaning of First World War commemoration While Haig's representation was more contested before the Second World War than was Kitchener's with several constituencies trying to fashion and use Haig's memory the Government the British Legion ex servicemen themselves and bereaved families it was probably less contested but overwhelmingly more negative than Kitchener's after the Second World War The book sheds light on the notion of heroic masculinity questioning in particular the degree to which the image of the common soldier replaced that of the high commander in the popular imagination and explores how the military heritage in the twentieth century came into collision with the culture of modernity It also contributes to ongoing debates in British historiography and to the larger debates over the social construction of memory the problematic relation between what is considered heritage and history and the need for historians to be sensitive and attentive to the interconnections between heritage and history and their contexts The War Plans of the Great Powers (RLE The First World War) Paul Kennedy, 2014-04-24 The origins of the First World War remain one of the greatest twentieth century historical controversies In this debate the role of military planning in particular and of militarism in general are a key focus of attention Did the military wrest control from the civilians Were the leaders of Europe eager for a conflict What military commitments were made between the various alliance blocks These questions are examined in detail here in eleven

essays by distinguished historians and the editor's introduction provides a focus and draws out the comparative approach to the history of military policies and war plans of the great powers

Social Goal-Objective Formation, Democracy and National Interest Kofi Kissi Dompere, 2014-03-29 This book presents the development of a theory of social goal objective formation and its relationship to national interest and social vision under a democratic decision choice system with imperfect information structure. It provides a framework for the application of fuzzy logic and its mathematics to the analysis in resolving conflicts in individual preferences in the collective decision choice space without violence. The book demonstrates how to use fuzzy logic and its mathematics in the study of economics, social sciences and other complex systems. It also presents the use of collaborative tools of opposites, duality, polarity, continuum in fuzzy paradigm with its logic, laws of thought and mathematics in developing a new approach to the theory of political economy in order to enhance the constructs of social decision choice theory.

Political Economy of Rent-Seeking and Profit-Harvesting Kofi Kissi Dompere, 2014-03-15 This volume presents an analysis of the problems and solutions of the market mockery of the democratic collective decision choice system with imperfect information structure composed of defective and deceptive structures using methods of fuzzy rationality. The book is devoted to the political economy of rent seeking, rent protection and rent harvesting to enhance profits under democratic collective decision choice systems. The toolbox used in the monograph consists of methods of fuzzy decision, approximate reasoning, negotiation games and fuzzy mathematics. The monograph further discusses the rent seeking phenomenon in the Schumpeterian and Marxian political economies where the rent seeking activities transform the qualitative character of the general capitalism into oligarchic socialism and making the democratic collective decision choice system as an ideology rather than social calculus for resolving conflicts in preferences in the collective decision choice space without violence.
