Haney, 2010-08-27 Presidents often assemble ad hoc groups of advisers to help them make decisions during foreign policy crises These advisers may include the holders of the traditional foreign policy positions secretaries of state and defense as well as others from within and without the executive branch It has never been clear what role these groups play in the development of policy In this landmark study Patrick Haney examines how these crisis decision groups were structured and how they performed the tasks of providing information advice and analysis to the president From this Haney investigates the links between a president s crisis management structure and the decision making process that took place during a foreign policy crisis Haney employs case studies to examine the different ways presidents from Truman through Bush used crisis decision making groups to help manage foreign policy crises He looks at the role of these groups in handling the Berlin blockade in 1948 the Suez Crisis in 1956 the Tet offensive in 1968 the Yom Kippur War in 1973 and the Panama invasion in 1989 among other crises He extends our understanding of the organization management and behavior of the decision making groups presidents assemble during foreign policy crises This book will appeal to scholars of the American presidency and American foreign policy Patrick Haney is Assistant Professor of Political Science Miami University of Ohio **Routledge Handbook of American Foreign Policy** Steven W. Congress and Foreign Policy United States. Congress. House. Committee on International Relations. Special Subcommittee on Investigations, 1976 [Organizing for Foreign Policy Crises](#) Patrick Jude Haney, 1997 U S presidents often assemble ad hoc groups of advisers to help them make decisions during foreign policy crises How presidents use these groups and how the groups are structured varies In this landmark study encompassing five presidential administrations Patrick Haney examines how these crisis decision groups were structured and how they performed the tasks of providing information advice and analysis to the president Haney employs case studies to examine the different ways presidents from Truman through Bush used crisis decision making groups to help manage foreign policy crisis

LBJ and the Presidential Management of Foreign Relations Paul Y. Hammond, 2010-07-22 In this insightful study Paul Y Hammond an experienced analyst of bureaucratic politics adapts and extends that approach to explain and evaluate the Johnson administration s performance in foreign relations in terms that have implications for the post Cold War era The book is structured around three case studies of Johnson s foreign policy decision making The first study examines economic and political development It explores the way Johnson handled the provision of economic and food assistance to India during a crisis in India s food policies This analysis provides lessons not only for dealing with African famine in later years but also for assisting Eastern Europe and the former Soviet Union The second case study focuses on U S relations with Western Europe at a time that seemed to require a major change in the NATO alliance Here Hammond illuminates the process of policy innovation particularly the costs of changing well established policies that embody an elaborate network of established interests The third case study treats the Vietnam War with special emphasis on how Johnson decided what to do about Vietnam Hammond critiques the rich scholarship available on Johnson s advisory process based on his own reading of the original sources These case studies are set in a larger context of applied theory that deals more generally with presidential management of foreign relations examining a president s potential for influence on the one hand and the constraints on his or her capacity to control and persuade on the other It will be important reading for all scholars and policymakers interested in the limits and possibilities of presidential power in the post Cold War era

Making of Canadian Food Aid Policy Mark W. Charlton, 1992-10-23 Since the Colombo Plan in the early 1950s food aid has been an important and highly visible component of the Canadian development assistance program Until the early 1970s however the Canadian food aid program was little more than a loosely connected collection of disparate programs designed to meet a host of sometimes conflicting objectives In the wake of the world food crisis of 1972-75 a growing number of groups began to question the developmental effectiveness of food aid In response the Canadian government undertook an extensive review and assessment of its food aid program which resulted in a series of new policy initiatives designed to change both the substance of food aid programs and the manner in which they were administered These changes marked a watershed in the history of the Canadian food aid program setting out the fundamental policy themes that have been consolidated and refined in the 1980s and early 1990s
