Remapping East Asia T. J. Pempel, 2005 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In *Remapping East Asia* T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly *Remapping East Asia* T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In *Remapping East Asia* T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly *China's Rise and Regional Integration in East Asia* Yong Wook Lee, Key-young Son, 2014-03-05 With featuring far reaching diversities and disparities among the regional states in their political economic and social systems and cultural and religious orientations East Asia is a microcosm of international society at large Nevertheless there are unique dynamics unfolding in East Asia at the turn of the twenty first century namely the rise of China as a contender for regional and global hegemony and a set of collective initiatives to integrate the region into a harmonious community This book provides new arguments on China s rise and the transformation of East Asia and analyzes the foreign policy behavior of the regional states and relations among them In doing so the contributors show why and how China is rising and how China s rise shapes the emerging regional structures and

institutions in East Asia Furthermore given the East Asian context where the world's second and third largest economies coexist with much smaller states and with China's ascendancy likely to continue this book challenges the pervasive dichotomy of hegemony and community This allows for a fuller and more nuanced account of China's role and the shifting regional policies in East Asia in which hegemonic cooperation does not necessarily lead to a hegemonic form of regional order Presenting strategic political economic and historical perspectives on China's changing role in the region and the development of regionalism China's Rise and Regional Integration in East Asia will be of great interest to students and scholars of Chinese politics Asian politics international relations and regionalism **Asien**, 2006 *American Book Publishing Record*, 2005

Beyond Japan Peter J. Katzenstein, Takashi Shiraishi, 2006 This book argues that East Asia's regional dynamics are no longer the result of a simple extension of any one national model **A World of Regions** Peter J. Katzenstein, 2015-05-01 Observing the dramatic shift in world politics since the end of the Cold War Peter J Katzenstein argues that regions have become critical to contemporary world politics This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization In detailed studies of technology and foreign investment domestic and international security and cultural diplomacy and popular culture Katzenstein examines the changing regional dynamics of Europe and Asia which are linked to the United States through Germany and Japan Regions Katzenstein contends are interacting closely with an American imperium that combines territorial and non territorial powers Katzenstein argues that globalization and internationalization create open or porous regions Regions may provide solutions to the contradictions between states and markets security and insecurity nationalism and cosmopolitanism Embedded in the American imperium regions are now central to world politics **The Political Economy of East Asia** K. Cai, 2016-04-30 In a systematic study of the political economy of East Asia Cai adopts an historical perspective alongside a contemporary focus exploring East Asia's development since the late 19th century Following similar paths to economic development East Asian states have achieved economic success integrating themselves into a regional economy **Regionalism, Economic Integration and Security in Asia** Jehoon Park, T. J. Pempel, Heungchong Kim, 2011-01-01 The prospects and value of economic integration and regionalism in Asia are increasingly evident in what could turn out to be the Asian Century It is within this context that this important book explores the critical economic issues security concerns and political themes pertinent to Asia in general and to East Asia in particular The book features contributions by both Asian and Western scholars who take an interdisciplinary approach encompassing economics political science and culture They address various issues including the application of European experiences to Asia and blend regional country perspectives with broader external views from Russia and the US In conclusion the book suggests a tentative roadmap and future directions for an Asian community asserting the importance of cultural and value studies This objective analysis of Asian regionalism explores perspectives from both within and outside the region As such it will prove a fascinating

Regionalism In East Asia: Why Has It Flourished Since 2000 And How Far Will It Go? Richard Pomfret, 2010-11-04 This book examines an important economic development in East Asia during the first decade of the 21st century Whereas regional arrangements were with the sole significant exception of ASEAN conspicuously absent before 2000 they have proliferated since 2000 in both the monetary and trade areas The book places this political development in the changing nature of the national economies especially their increasing integration into regional and global value chains with the fragmentation of production processes This is a freshly written coherent analysis of the topic drawing upon updated material from a series of articles that the author has published on the subject over the years Although the book is based on theoretical and especially empirical analysis of regionalism it is written in a non technical style accessible to a wide range of readers The book is likely to be adopted as supplementary reading for university courses on Asian economies whether be it in area studies or economics political economy disciplines

Dynamics of Change in East Asia P.W. Preston, 2018-03-08. Over the past forty years, East Asia has been radically transformed from a war-damaged sub-continent to a region of global pre-eminence. With new highly developed scientific resources, great economic strengths, significant global trading links and equally powerful financial resources, East Asia is now one of the most dynamic regions in the global system. This book illuminates the historical development trajectory and contemporary circumstances of the countries of the region. Embracing a cross-disciplinary perspective, it summarises the history of the region and goes on to focus upon the rise of East Asia since the ruins of the Pacific War. Analysing the region's basic strengths and the distinctive elite development strategies across the various countries, it also examines areas of domestic, intra-regional and international conflict. It covers the basic ground of political economy, society, culture and politics whilst also taking care to locate the contemporary region in its own history and asking what further change can be expected in the future.
