A Distinguished Example of Early French Woodcut Art

**55. ERUDITORIUM POENITEN-

TIALE.** Lettre Nâtarde. 76 leaves. 24-25
lines. With 17 beautiful woodcuts (one is a
repetition). Some leaves uncut. 4to. Doeskin.
N.pl., n.d. (Paris, Antoine Caillaut, 1487).

A fine large copy of the rare first edition of an
instruction for doing penance in a manner pre-
scribed by the Church.
It contains remarkable woodcuts ranking "amongst
the earliest French examples of the art... only
having the remotest resemblance to Netherlandish
work of the period."

Twelve of them appear here for the first time. Four
others were also used in Caillaut's *Livre de bonnes
mœurs*, which he dated June 7, 1487 in its colophon.
Three of these belong to the series of the seven
cardinal vices represented "in the form of men in
characteristic attitudes riding upon animals supposed

bia, Avaritia and Luxuria.

The first edition of the *Eruditorium* differs slightly
from the second (see references: *Comus* E 81) in the
typographical arrangement and also by the fact that
in the chapter dealing with the sin of debauchery
the woodcut representing *Acidia* is repeated, while
the *Luxuria* cut is present in the second edition. The
Luxuria cut was either not available when the first
edition was published, or it was not yet made. The
second explanation would be in favor of the assump-
tion that the *Eruditorium* was printed before the
Livre de bonnes mœurs.

La Salle and His Legacy Patricia K. Galloway, 2011-03-07 To most people it probably seems that La Salle and his men permanently fixed in the pantheon of explorers of the North American continent need little further introduction The fact is that this whole early period of exploration and colonization by the French in the southeastern United States has received far less scholarly attention than the corresponding English and Spanish activities in the same area and even the existing scholarship has failed to focus clearly upon the Indian tribes whose attitudes toward the European newcomers were crucial to their very survival In this collection of essays marking the tricentennial of Ren Robert Cavelier de La Salle's 1682 expedition into the Lower Mississippi Valley thirteen scholars from a variety of disciplines assess his legacy and

the significance of French colonialism in the Southeast These scholars in the fields of French colonial history and the ethnohistory of the Indians of the Louisiana Colony deal with a diversity of topics ranging from La Salle s expedition itself and its place in the context of New World colonialism in general to the interaction of French settlers with native Indian tribes

La Salle and the Discovery of the Great West Francis Parkman,1885 *Lost Maps of the Caliphs* Yossef Rapoport,Emilie Savage-Smith,2018-12-11 About a millennium ago in Cairo an unknown author completed a large and richly illustrated book In the course of thirty five chapters this book guided the reader on a journey from the outermost cosmos and planets to Earth and its lands islands features and inhabitants This treatise known as The Book of Curiosities was unknown to modern scholars until a remarkable manuscript copy surfaced in 2000 Lost Maps of the Caliphs provides the first general overview of The Book of Curiosities and the unique insight it offers into medieval Islamic thought Opening with an account of the remarkable discovery of the manuscript and its purchase by the Bodleian Library the authors use The Book of Curiosities to re evaluate the development of astrology geography and cartography in the first four centuries of Islam Their account assesses the transmission of Late Antique geography to the Islamic world unearths the logic behind abstract maritime diagrams and considers the palaces and walls that dominate medieval Islamic plans of towns and ports Early astronomical maps and drawings demonstrate the medieval understanding of the structure of the cosmos and illustrate the pervasive assumption that almost any visible celestial event had an effect upon life on Earth Lost Maps of the Caliphs also reconsiders the history of global communication networks at the turn of the previous millennium It shows the Fatimid Empire and its capital Cairo as a global maritime power with tentacles spanning from the eastern Mediterranean to the Indus Valley and the East African coast As Lost Maps of the Caliphs makes clear not only is The Book of Curiosities one of the greatest achievements of medieval mapmaking it is also a remarkable contribution to the story of Islamic civilization that opens an unexpected window to the medieval Islamic view of the world **France and England in North America (Vol. 1-7)**
