Premenstrual Syndrome (PMS) is a major problem for between 30 percent to 40 percent of menstruating women in the United States. Although in most cases symptoms are relatively mild, some women experience severe discomfort and pain. Symptoms of PMS range from headaches and cramping to depression and confusion. Remedies fill just as broad a spectrum. While for some women aspirin proves effective, others in more severe cases have turned to prescription drugs such as Prozac and Valium. In actuality, however, the side effects of such drugs outweigh their benefits. On the positive side, there are other more natural options. Dietary therapy, nutritional supplementation, and exercise are three elements of a simple seven-step program designed by Michael T. Murray, N.D., who is widely regarded as one of the world's leading authorities on natural medicine. In Premenstrual Syndrome, Dr. Murray shares his expertise and natural approach to the problem of PMS. First, he overviews PMS, including diagnosis and classification information. He then discusses various natural ways to reduce monthly discomfort. Treatments include dietary changes like reducing intake of fat and caffeine while increasing an intake of soy foods. Nutritional supplementation and an exercise program are two other treatment options. Murray also includes information about Low Thyroid Function in PMS, Herbal Support for PMS, Other Female Conditions Associated with PMS. In this thorough guide, Murray takes readers through his simple program that will allow women to control monthly discomforts naturally and effectively. Overcoming PMS the Natural Way Marilyn Glenville, 2006. Marilyn Glenville, a leading nutritional therapist from the UK, explains that the discomfort and pain associated with the menstrual cycle is not inevitable. She shows you simple nutritional and lifestyle changes you can make that will balance your hormones and relieve your symptoms. Provided by publisher.
