Bauer,2014-01-14 The purpose of Remembering the Times of Our Lives Memory in Infancy and Beyond is to trace the development from infancy through adulthood in the capacity to form retain and later retrieve autobiographical or personal memories It is appropriate for scholars and researchers in the fields of cognitive psychology memory infancy and human development      **Smartphones as Locative Media** Jordan Frith,2018-06-06 Smartphone adoption has surpassed 50% of the population in more than 15 countries and there are now more than one million mobile applications people can download to their phones Many of these applications take advantage of smartphones as locative media which is what allows smartphones to be located in physical space Applications that take advantage of people s location are called location based services and they are the focus of this book Smartphones as locative media raise important questions about how we understand the complicated relationship between the Internet and physical space This book addresses these questions through an interdisciplinary theoretical framework and a detailed analysis of how various popular mobile applications including Google Maps Facebook Instagram Yelp and Foursquare use people s location to provide information about their surrounding space The topics explored in this book are essential reading for anyone interested in how smartphones and location based services have begun to impact the ways we navigate and engage with the physical world      **A Mindset for Mobile Learning** Julian Stodd,2012-11-08 The subject of this book is mobile learning but mobile means many things it means technology as in a mobile phone or tablet and it also means mobile learning courses themselves as well as being used to describe the experience of learning in this way of experiencing mobile I m interested in all of these things in exploring what they each mean and how we can pull them together to provide a meaningful narrative of how we develop and experience mobile learning It s easy to think of mobile as just being a distribution channel like a television or a radio We can view the devices as just conduits to push content out to learners but this is to miss so much of the potential potential that is only unfolding to us as we speak People interact with mobile devices in fundamentally different ways they are social tools used to reinforce our standing fashion statements aspirational decoration sources of knowledge and power able to make us win a pub quiz or find a pizza but also business tools used to organize meetings remind us of deadlines and let us speak to the boss when we re running late Mobile devices transcend the traditional boundaries of our lives crossing over between the formal spaces of work and the informal social spaces that surround it The devices are not purely functional they are much much more It s important that we understand just how widely mobile has permeated our lives how often we reach into our pocket and ready

our thumbs for action We need to recognize how it impacts on knowledge we used to have to know things whilst now we often only need to know how to find those things out fast Knowing how to use Google is often enough We need to develop a mindset for mobile learning     Gardening with Free-Range Chickens For Dummies Bonnie Jo Manion,Robert T.
