## **Remodelling The Italian Financial System:**

**The Italian Financial System Remodelled** P. Ciocca, 2004-11-10 This book looks at the banking and finance industries in Italy and how these industries contribute to the Italian economy Could these industries be the solution to the contradiction in which the country's economy has been caught for several years it is better governed than it has been in the past but is not growing as much as it could The book looks at how this solution might be achieved and what factors will govern the contribution of the banking and finance industries

The Italian Financial System Remodelled P. Ciocca, 2004-11-10 This book looks at the banking and finance industries in Italy and how these industries contribute to the Italian economy Could these industries be the solution to the contradiction in which the country's economy has been caught for several years it is better governed than it has been in the past but is not growing as much as it could The book looks at how this solution might be achieved and what factors will govern the contribution of the banking and finance industries

**The Italian Banking System** Stefano Cosma, 2012-11-13 Why was the Italian Banking System more resilient during the sub prime crisis and harder hit in the sovereign crisis Will their strength in the retail market result as an asset or a liability for Italian banks in the future This book offers an in depth analysis of one of the most important EU banking systems its attempts to weather the crisis

*Shareholder Empowerment* Maria Goranova, Lori Versteegen Ryan, 2015-12-27 In this volume leading management experts offer critical insights into the promises and illusions of shareholder empowerment the discrepancies between theory and practice and the challenges posed by variations in global corporate governance regimes

*An Institutional History of Italian Economics in the Interwar Period — Volume I* Massimo M. Augello, Marco E.L. Guidi, Fabrizio Bientinesi, 2019-11-25 Italy is well known for its prominent economists as well as for the typical public profile they have constantly revealed But when facing an illiberal and totalitarian regime how closely did Italian economists collaborate with government in shaping its economic and political institutions or work independently This edited book completes a gap in the history of Italian economic thought by providing a complete work on the crucial link between economics and the Fascist regime covering the history of political economy in Italy during the so called Ventennio 1922 1943 with an institutional perspective The approach is threefold analysis of the academic and extra academic scene where economic science was elaborated and taught the connection between economics society and politics and dissemination of scientific debate Special attention is given to the bias caused by the Fascist regime to economic debate and careers This Volume I deals with the economics profession under Fascism in particular in light of the political and institutional changes that the regime introduced the restructuring of higher education the restriction of freedom in teaching and of the press and with respect to promoting its own strategies of political and ideological propaganda Volume II available separately considers the public side of the economics profession the fascistisation of culture and institutions banishment and emigration of opponents and post WW2 purge of Fascist economists

**Energy and Seismic Renovation Strategies for Sustainable Cities** Giuseppe Margani, 2019-06-11 The principle of

sustainability should be strictly connected with safety since both aim to conserve resources in the case of sustainability the resources are typically thought of as environmental while in the case of safety the resources are basically human In spite of this common ground discussions on sustainability usually give insufficient attention to safety In the last years the EU has made large investments to increase the energy efficiency of the existing building stock paving the way for a low carbon future however less effort has been made to enhance its seismic resilience Therefore the safety and consequently the sustainability of towns situated in earthquake prone countries remain inadequate In such countries energy renovation actions should be combined with seismic retrofitting However a number of barriers considerably limit the real possibility of extensively undertaking combined retrofit actions especially for multi owner housing and high rise buildings These barriers are of different kinds technical e g unfeasibility and or ineffectiveness of conventional retrofit solutions financial e g high renovation costs insufficient incentives subsidies organizational e g occupants disruption and relocation renovation consensus by condominium ownerships and cultural social insufficient information and skills lack of adequate policy measures for promoting renovation actions This book aims to overcome these barriers and to bridge the gap between sustainability and safety so to conserve both human and environmental resources

**The Financial Systems of Industrial Countries** Riccardo De Bonis,Alberto Franco Pozzolo,2012-01-05 This book offers a comprehensive overview of the financial systems of major industrialized countries using the statistical framework of the financial accounts After a discussion of how economists agreed to create a framework to monitor the financial linkages between surplus and deficit sectors the book analyzes in detail the composition and the recent evolution of financial assets and liabilities for households including public pension rights firms and intermediaries Next the volume studies the convergence patterns of financial structures and their influence on the effectiveness of monetary policy within European countries The final chapter unifies the previous pictures showing how the effects of financial integration and global imbalances could have been foreseen based on the financial accounts The analysis and information contained in the book will help the readers to understand many issues and challenges raised by the recent financial crisis

Italian Fascism, 1915-1945 Philip Morgan,2017-03-14 It is now 80 years since Mussolini's Fascism came to power in Italy but the political heirs of the original Fascism are part of government in today's Italy The resurgence of neo fascist and neo Nazi extremism all over Europe are a reminder of the continuing place of fascism in contemporary European society despite its political and military defeat in 1945 This thoroughly revised updated and expanded edition provides a critical and comprehensive overview of the origins of Fascism and the movement's taking and consolidation of power Philip Morgan Explains how the experience of the First World War created Fascism Describes how the unsettled post war conditions in Italy enabled an initially small group of political adventurers around Mussolini to build a large movement and take power in 1922 Focuses on the workings of the first ever totalitarian system and its impacts on the lives and outlooks of ordinary Italians Considers the meshing of internal fascistisation and expansionism which emerged most

clearly after 1936 as Italy became more closely aligned with Nazi Germany Examines the demise of Italian Fascism between 1943 and 1945 as Mussolini and his party became the puppets of Nazism Provides an explanation and interpretation of Fascism locating it in contemporary history and taking account of recent debates on the nature of the phenomenon Clear and approachable this essential text is ideal for anyone interested in Italy's turbulent political history in the first half of the 20th century

Private Bankers in the Italian 19th Century Luciano Maffi, 2020-12-14 The book analyses the role of private bankers who were pivotal in modernizing the economic and financial system of Italy in the XIX century To achieve this they needed to interact with the international haute banque to organize and place the public loans and the large investments associated with the joint stock companies The theme of reputation which is currently at the centre of the historiographical debate is fundamental for the study of the private banker figures whose professional success is linked to the limitless trust accorded to them by their circle of personal contacts Historiography has studied the role of Italian bankers in the trade credit and international finance during the modern age XVI XVIII centuries but it has not analysed the banking system in the XIX century and its national and international relations The case study of Banca Parodi of Genova fills the historiographical gap concerning the role of private bankers and banking institutions in Italy highlighting the network between the Parodi family and the international haute banque one of the most emblematic cases is the Rothschild family The book presents a re-elaborates series of unpublished data placing them at the disposal of the scientific community and analyses the role of private bankers in the development of Italian banking institutions in the XIX century to launch a scientific debate

**Nearly Zero Energy Building Refurbishment** Fernando Pacheco Torgal, Marina Mistretta, Artūras Kaklauskas, Claes G. Granqvist, Luisa F. Cabeza, 2013-10-22 The recast of the Energy Performance of Buildings Directive EPBD was adopted by the European Parliament and the Council of the European Union on 19 May 2010 For new buildings the recast fixes 2020 as the deadline for all new buildings to be nearly zero energy and even sooner for public buildings by the end of 2018 This book gives practitioner an important tool to tackle the challenges of building refurbishment towards nearly zero energy This book is welcome at this time and sets the scene for professionals whether practitioners or researchers to learn more about how we can make whether old or new buildings more efficient and effective in terms of energy performance

*Local Economic Systems and Housing Real Estate Markets in University Towns* Alessandra Oppio, Marta Bottero, Stefano Stanghellini, Marco Rossitti, 2025-06-20 This book investigates the relationship between universities real estate markets and local economic systems in light of contemporary urban regeneration processes and sustainability challenges Indeed university settlements can generate important spillovers and opportunities in their territory thus becoming decisive development and transformation factors for cities socio economic productive environmental and infrastructural components Furthermore the increasing student mobility to university towns raises relevant sustainability issues concerning the housing demand stemming from off site students which by strongly impacting the real estate market can place students families and low

income residents against important financial barriers By collecting the papers presented at the SIEV Italian Society of Appraisal and Valuation seminar held in Florence Italy in November 2023 within the context of the Urbanpromo Progetti per il Paese cultural event the book delves into understanding and assessing the complexity of the effects generated by investments in university settlements as a fundamental factor for effective urban development policies aimed both at meeting the right to study and maximizing impacts from a circular perspective The proposed reflections finding their common thread in the use of interpretative models and methodological tools of the appraisal and valuation discipline are organized into three parts Part I Investing in university cities sustainability and urban regeneration issues Part II University and real estate markets evaluation issues and models Part III Real estate market and governance in university cities evidence from case studies

**Energy-efficient Office Refurbishment** Simon Burton, 2013-10-18 Little has been published on the subject of energy efficient refurbishment of offices despite the growing need to refurbish older office building stock throughout Europe and the global requirement to conserve energy The book suggests the most energy efficient and environmentally friendly way to refurbish offices using examples of real buildings and designs wherever possible Each case study includes a building description the retrofitting strategy passive and low energy technologies used energy assessment comfort and environment assessment financial assessment client and market assessment and conclusion This practical design manual will be invaluable for architects and engineers specialising in the refurbishment of commercial buildings

**Who's who in Economics** Mark Blaug, 1986 This edition includes 337 more entries bringing the total to over 1 400 thumbnail sketches of economists who have contributed to the literature over the past three centuries

**Making Trieste Italian, 1918-1954** Maura Elise Hametz, 2005 Traces the changing identity and ownership of the important city of Trieste in a turbulent period The port of Trieste standing at a crucial strategic point at the head of the Adriatic had a turbulent history in the mid twentieth century With the disappearance of the Habsburg empire after the First World War it passed into Italian hands During the Second World War the Nazis reclaimed the city as part of the Reich In 1945 Trieste slipped through Tito's fingers and was internationalised under Allied military government control returning to Italian sovereignty in 1954 This book examines Trieste's transformation from an imperial commercial centre at the crossroads of the Italian German and Balkan worlds to an Italian border city on the southern fringe of the iron curtain Concentrating on local sources the book shows how Triestines renowned for their cosmopolitan Central European affiliations articulated an Italian civic identity after the First World War and traces the fitful process of affirming Trieste's Italianness over the course of nearly four decades of liberal Fascist and international rule It suggests that Italianisation resulted from complicated interactions with Rome and interference by international powers attempting to strengthen western Europe at the edge of the Balkans

**Cost-Effective Energy Efficient Building Retrofitting** F. Pacheco-Torgal, Claes-Göran Granqvist, Bjørn Peter Jelle, Giuseppe Peter Vanoli, Nicola Bianco, Jarek Kurnitski, 2017-01-03 Cost Effective Energy Efficient Building Retrofitting Materials Technologies

Optimization and Case Studies provides essential knowledge for civil engineers architects and other professionals working in the field of cost effective energy efficient building retrofitting The building sector is responsible for high energy consumption and its global demand is expected to grow as each day there are approximately 200 000 new inhabitants on planet Earth The majority of electric energy will continue to be generated from the combustion of fossil fuels releasing not only carbon dioxide but also methane and nitrous oxide Energy efficiency measures are therefore crucial to reduce greenhouse gas emissions of the building sector Energy efficient building retrofitting needs to not only be technically feasible but also economically viable New building materials and advanced technologies already exist but the knowledge to integrate all active components is still scarce and far from being widespread among building industry stakeholders Emphasizes cost effective methods for the refurbishment of existing buildings presenting state of the art technologies Includes detailed case studies that explain various methods and Net Zero Energy Explains optimal analysis and prioritization of cost effective strategies ,

Cost-Effective Energy-Efficient Methods for Refurbishment and Retrofitting of Buildings F. Pacheco-Torgal, Claes-Göran Granqvist, Giuseppe Peter Vanoli, Nicola Bianco, Jarek Kurnitski, 2025-01-11 Cost Effective Energy Efficient Methods for Refurbishment and Retrofitting of Buildings Materials Technologies Optimization and Case Studies provides up to date knowledge on this important research field Divided over three key parts the book s chapters cover materials and innovative technologies optimization strategies and actual case study applications that highlight the impact of different climatic conditions social factors and the economic specifications of each retrofit process Emphasis is placed on cost efficiency which is key in any energy retrofit process Taking into consideration key changes in the Energy Performance of Buildings Directive EPBD and the European Union Green Deal on Refurbishment and Renovation this book will be a valuable reference resource for materials scientists architects civil engineers and all those working on cost effective and energy efficient retrofitting and building refurbishment Discusses cost effective energy efficient methods for the refurbishment of existing buildings using state of the art technologies Includes detailed case studies that explain various methods and Net Zero Energy Explains optimal analysis and prioritization of cost effective strategies Debates ... in the session 1876-77 (-1885-86). Malta council

of government, 1878 **History of Construction Cultures Volume 2** João Mascarenhas-Mateus, Ana Paula Pires, 2021-07-08 Volume 2 of History of Construction Cultures contains papers presented at the 7ICCH Seventh International Congress on Construction History held at the Lisbon School of Architecture Portugal from 12 to 16 July 2021 The conference has been organized by the Lisbon School of Architecture FAUL NOVA School of Social Sciences and Humanities the Portuguese Society for Construction History Studies and the University of the Azores The contributions cover the wide interdisciplinary spectrum of Construction History and consist on the most recent advances in theory and practical case studies analysis following themes such as epistemological issues building actors building materials building machines tools and equipment construction processes building services and techniques structural theory and analysis political social

and economic aspects knowledge transfer and cultural translation of construction cultures Furthermore papers presented at thematic sessions aim at covering important problematics historical periods and different regions of the globe opening new directions for Construction History research We are what we build and how we build thus the study of Construction History is now more than ever at the centre of current debates as to the shape of a sustainable future for humankind Therefore History of Construction Cultures is a critical and indispensable work to expand our understanding of the ways in which everyday building activities have been perceived and experienced in different cultures from ancient times to our century and all over the world

Studies in the History of Public Economics Gilbert Faccarello, Richard Sturn, 2014-06-17 Many important economic and political debates today refer to the nature and the role of the State should governments intervene in the economy and interfere with the operation of markets In which occasions and how In order to better understand these questions and the controversies they have raised this book re considers the debates crucial for the issues at stake the most important schools of thought and the central concepts in an historical perspective After a tribute to Sir Alan Peacock and the first publication of two hitherto unpublished papers written in the 1950s the chapters focus on important developments that occurred in Europe during the 19th and early 20th centuries The final part includes contributions on public economics after World War II focusing on concepts such as merit goods externalities and the Coase theorem This book was originally published as a special issue of The European Journal of the History of Economic Thought
