Jan Gossart and the Invention of Netherlandish Antiquity Marisa Bass, 2016-03-29 This is the first in depth historical study of Jan Gossart ca 1478 1532 one of the most important painters of the Renaissance in northern Europe Providing a richly illustrated narrative of the Netherlandish artist s life and art Marisa Anne Bass shows how Gossart s paintings were part of a larger cultural effort in the Netherlands to assert the region s ancient heritage as distinct from the antiquity and presumed cultural hegemony of Rome Focusing on Gossart s vibrant monumental mythological nudes the book challenges previous interpretations by arguing that Gossart and his patrons did not slavishly imitate Italian Renaissance models but instead sought to contest the idea that the Roman past gave the Italians a monopoly on antiquity Drawing on many previously unused primary sources in Latin Dutch and French Jan Gossart and the Invention of Netherlandish Antiquity offers a fascinating new understanding of both the painter and the history of northern European art at large

The Geometry of Creation Robert Bork, 2016-12-05 The flowering of Gothic architecture depended to a striking extent on the use of drawing as a tool of design By drawing precise blueprints with simple tools such as the compass and straightedge Gothic draftsmen were able to develop a linearized architecture of unprecedented complexity and sophistication Examination of their surviving drawings can provide valuable and remarkably intimate information about the Gothic design process Gothic drawings include compass pricks uninked construction lines and other telltale traces of the draftsman s geometrically based working method The proportions of the drawings moreover are those actually intended by the designer uncompromised by errors introduced in the construction process All of these features make these drawings ideal subjects for the study of Gothic design practice but their geometry has to date received little systematic attention This book offers a new perspective on Gothic architectural creativity It shows in a series of rigorous geometrical case studies how Gothic design evolved over time in two senses in the hours of the draftsman s labor and across the centuries of the late Middle Ages In each case study a series of computer graphics show in unprecedented detail how a medieval designer could have developed his architectural concept step by step using only basic geometrical operations Taken together these analyses demonstrate both remarkable methodological continuity across the Gothic era and the progressive development of new and sophisticated permutations on venerable design themes This rich tradition ultimately gave way in the Renaissance not because of any inherent problem with Gothic architecture but because the visual language of Classicism appealed more directly to the pretensions of Humanist princes than the more abstract geometrical order of Gothic design as the book s final chapter demonstrates

Toward a Premodern Posthumanism Chad Augustine Córdova, 2025-04-15 Drawing on early modern

French thought to free nature and aesthetics from metaphysical humanism What good is aesthetics in a time of ecological crisis Toward a Premodern Posthumanism Anarchic Ontologies of Earthly Life in Early Modern France shows that philosophical aesthetics contains unheeded potentialities for challenging the ontological subjection of nature to the human subject Drawing on deconstructive ecological and biopolitical thought Chad C rdova uncovers in aesthetics something irreducible to humanist metaphysics an account of how beings emerge and are interrelated responsive and even response able without reason or why This anarchic and atelic ontology recovered from Kant becomes the guiding thread for a new premodern trajectory of posthumanism Charting a path from Aristotle to Heidegger to today s plant thinking with new readings of Montaigne Pascal Diderot Rousseau and others along the way this capacious study reveals the untimely relevance of pre 1800 practices of writing science and art Enacting a multitemporal mode of reading C rdova offers a defense and illustration of the importance of returning to early modern texts as a way to rethink nature art ethics and politics in a time when these concepts are in flux and more contentious than ever *Hero or Tyrant? Henry III, King of France, 1574-89*

Robert J. Knecht, 2016-04-22 King Henry III of France has not suffered well at the hands of posterity Generally depicted as at best a self indulgent ineffectual ruler and at worst a debauched tyrant responsible for a series of catastrophic political blunders his reputation has long been a poor one Yet recent scholarship has begun to question the validity of this judgment and look for a more rounded assessment of the man and his reign For as this new biography of Henry demonstrates there is far more to this fascinating monarch than the pantomime villain depicted by previous generations of historians and novelists Based upon a rich and diverse range of primary sources this book traces Henry s life from his birth in 1551 the sixth child of Henri II and Catherine de Medici It following his upbringing as the Wars of Religion began to tear France apart his election as king of Poland in 1573 and his assumption of the French crown a year later following the death of his brother Charles IX The first English language biography of Henry for over 150 years this study thoroughly and dispassionately reassesses his life in light of recent scholarship and in the context of broader European diplomatic political and religious history In so doing the book not only provides a more nuanced portrait of the monarch himself but also helps us better understand the history of France during this traumatic time *The Creation of the French Royal Mistress* Tracy Adams, Christine Adams, 2020-03-16

Kings throughout medieval and early modern Europe had extraconjugal sexual partners Only in France however did the royal mistress become a quasi institutionalized political position This study explores the emergence and development of the position of French royal mistress through detailed portraits of nine of its most significant incumbents Agn s Sorel Anne de Pisseleu d Heilly Diane de Poitiers Gabrielle d Estr es Fran oise Louise de La Baume Le Blanc Fran oise Ath na s de Rochechouart de Mortemart Fran oise d Aubign Jeanne Antoinette Poisson and Jeanne B cu Beginning in the fifteenth century key structures converged to create a space at court for the royal mistress The first was an idea of gender already in place that while women were legally inferior to men they were men s equals in competence Because of their legal

subordinacy queens were considered to be the safest regents for their husbands and subsequently the royal mistress was the surest counterpoint to the royal favorite Second the Renaissance was a period during which people began to experience space as theatrical This shift to a theatrical world opened up new ways of imagining political guile which came to be positively associated with the royal mistress Still the role had to be activated by an intelligent charismatic woman associated with a king who sought women as advisors The fascinating particulars of each case are covered in the chapters of this book Thoroughly researched and compellingly narrated this important study explains why the tradition of a politically powerful royal mistress materialized at the French court but nowhere else in Europe It will appeal to anyone interested in the history of the French monarchy women and royalty and gender studies

Visual Theology of the Huguenots Randal Carter Working, 2017-02-23 The role of architecture within the French Reformed tradition has been of recent scholarly interest seen in the work of Helene Guicharnaud Catharine Randall Andrew Spicer and others Few however have investigated in depth the relationship between Reformed theology and architectural forms In *The Visual Theology of the Huguenots* Randal Carter Working explores the roots of Reformed aesthetics set against the background of late medieval church architecture Indicating how demonstrably important the work of Serlio is in the spreading of the ideas of Vitruvius Working explains the influence of classical Roman building on French Reformed architecture He follows this with an examination of five important Huguenot architects Philibert de l'Orme Bernard Palissy Jacques Androuet du Cerceau Salomon de Brosse and Jacques Perret The distinct language of Huguenot architecture is revealed by his comparative analysis of three churches St Pierre in Geneva a medieval church overhauled by the Reformers St Gervais St Protais a Parisian Catholic church whose facade was completed by the French Reformed architect Salomon de Brosse and the temple at Charenton a structure also designed and built by de Brosse These three buildings demonstrate how the contribution of Huguenot architecture gave expression to Reformed theological ideas and helped bring about the renewal of classicism in France

Lost Artefacts from Medieval England and France Katherine Baker, 2022 Contemporary descriptions of objects no longer extant examined to reconstruct these lost treasures Surviving accounts of the material culture of medieval Europe including buildings boats reliquaries wall paintings textiles ivory mirror cases book bindings and much more present a tantalising glimpse of medieval life hinting at the material richness of that era However students and scholars of the period will be all too familiar with the frustration of trying to piece together a picture of the past from a handful of fragments The material turn has put art architecture and other artefacts at the forefront of historical and cultural studies and the resulting spotlight on the material culture of the past has been illuminating for researchers in many fields Nevertheless the loss of so much of the physical remnants of the Middle Ages continues to thwart our understanding of the period and much of the knowledge we often take for granted is based on a series of arbitrary survivals The twelve essays in this book draw on a wide array of sources and disciplines to explore how textual records from the chronicles of John of Worcester and Matthew Paris and inventories of monastic treasuries and noble

women to Beowulf and early English riddles when combined with archaeological and art historical evidence can expand our awareness of artistic and cultural environments Touching on a broad range of issues around how we imaginatively reconstruct the medieval past and a variety of objects both precious and ephemeral this volume will be of fundamental interest to medieval scholars whatever their disciplinary field Contributors Katherine Baker Marian Bleeke Deirdre Carter Laura Cleaver Judith Collard Joshua Davies Kathryn Gerry Karl Kinsella Katherine A Rush Katherine Weikert Beth Whalley Victoria Yuskaitis
