Feder, 2014-04-24 A philosopher offers a framework for the treatment of intersex children and a moral argument for responsibility to them and their families Putting the ethical tools of philosophy to work Ellen K Feder seeks to clarify how we should understand the problem of intersex Adults often report that medical interventions they underwent as children to correct atypical sex anatomies caused them physical and psychological harm Proposing a philosophical framework for the treatment of children with intersex conditions one that acknowledges the intertwined identities of parents children and their doctors Feder presents a persuasive moral argument for collective responsibility to these children and their families In a voice both urgent and nuanced Feder squarely faces the complexities that accompany the care of people with atypical sex anatomies in medical science Rich with cross discipline potential Feder's engaging argument should provide a new approach for doctors and parents caring for children with atypical sex anatomy Publishers Weekly starred review Feder's book is a welcome injection of new ideas into feminist scholarship on intersex post Consensus Statement era Women's Review of Books Is a work of philosophy capable of bringing insightful new perspectives or illuminating and forceful arguments to an urgent social matter so as truly to effect a felt change in the lives of people concerned by it Feder's book is capable of this effect As such it takes the risk of calling forth a new public or a new readership and so is a work whose appeal could well be ahead of its time But its time should be here International Journal of Feminist Approaches to Bioethics Making Sense of Intersex significantly enhances our understanding of intersex and the ethical issues involved in medical practice more generally

Participatory Case Study Work Sion Williams, John Keady, 2021-01-03 Participatory Case Study Work shows academic co researchers how to adapt and implement their methods so that data collection and analysis is authentically participatory At the heart of this text is advocating a participatory approach to case study work with co construction as a catalyst for shared understanding and action in advancing ageing studies Whilst case study research has a relatively long tradition in the canon of research methodologies little attention has so far been paid to the importance and value of participatory case study work This is surprising as its egalitarian and democratic value base naturally lends itself to the co production and co creation of personal and collective theory drawn directly from lived experience The book brings together over 15 years worth of participatory case study work in ageing studies in which the editors have been actively involved as either front line researchers or as supervisors to PhD and MPhil studies adopting the methodology and from where each of the contributors is selected Real life case examples are shared in the main chapters of the book and they provide direction as to how learning can be applied to other settings The chapters also contain key references and recommended reading This volume will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as research methods qualitative methods ageing studies and mental health studies Bookseller and the Stationery Trades' Journal ,1910 *Story Stretchers* Shirley C.
