**Sarah's Prairie** Delbert Friesen Plett,1995      *Novel Approaches to Lesbian History* Linda Garber,2022-01-01 Novel Approaches to Lesbian History tells a tale about history and community in our allegedly post identity era examining contemporary novels that depict lesbian characters in recognizable historical situations These imaginative stories provide a politically vital speculative past in the face of a sketchy problematic archive Among the memorable characters in some 200 novels are pirates cowgirls and famous artists ghosts and time travellers immigrants and lovers The best lesbian historical novels are conscientious and buoyant as they engage critical historiographical questions but Novel Approaches also discusses the class and race biases that weigh on the genre Some lesbian historical novels are based on archival evidence others on conjecture or fantasy but all convey the true fact that identity is elusive without a past without which its future is nearly impossible      The Novels of J. Houser,2014-06-03 The 1970s brought a new understanding of the biological and intellectual impact of environmental crises

on human beings As efforts to prevent ecological and bodily injury aligned a new literature of sickness emerged Ecosickness fiction imaginatively rethinks the link between these forms of threat and the sick body to bring readers to environmental consciousness Tracing the development of ecosickness through a compelling archive of contemporary U S novels and memoirs Ecosickness in Contemporary U S Fiction establishes that we cannot comprehend environmental and medical dilemmas through data alone and must call on the sometimes surprising emotions that literary metaphors tropes and narratives deploy In chapters on David Foster Wallace Richard Powers Leslie Marmon Silko Marge Piercy Jan Zita Grover and David Wojnarowicz Heather Houser shows how narrative affects such as wonder and disgust organize perception of an endangered world and orient us ethically toward it The study builds the connective tissue between contemporary literature ecocriticism affect studies and the medical humanities It also positions ecosickness fiction relative to emergent forms of environmentalism and technoscientific innovations such as regenerative medicine and alternative ecosystems Houser models an approach to contemporary fiction as a laboratory for affective changes that spark or squelch ethical projects
