Sarvary Katalin:

Empire Within Alexander Barder, 2015-03-24 This book explores the reverberating impacts between historical and contemporary imperial laboratories and their metropolises through three case studies concerning violence surveillance and political economy The invasions of Afghanistan in 2001 and Iraq in 2003 forced the United States to experiment and innovate in considerable ways Faced with growing insurgencies that called into question its entire mission the occupation authorities engaged in a series of tactical and technological innovations that changed the way it combated insurgents and managed local populations The book presents new material to develop the argument that imperial and colonial contexts function as a laboratory in which techniques of violence population control and economic principles are developed which are subsequently introduced into the domestic society of the imperial state The text challenges the widely taken for granted notion that the diffusion of norms and techniques is a one way street from the imperial metropole to the dependent or weak periphery This work will be of great interest to scholars of international relations critical security studies and international relations theory

Turkey and the European Union Selcen Öner, 2011-02-16 European identity has always been in a state of construction With the creation of the European Union however this construction now takes place within an institutional framework introducing a number of new variables Selcen Öner's *Turkey and the European Union* The Question of European Identity is an in depth analysis of the influence of these two entities on each others identity as Europeans in a society of increasing social political and cultural connectedness The mutual influence between Turks and Europeans gained significant momentum in 1999 when the European Union granted official candidate status to Turkey at that year's Helsinki Summit Turkey's Europeanness is still being debated despite the official stance that fulfilling the Copenhagen criteria and adopting the EU acquis are enough for being a full member of the EU These debates have even lead to arguments between political elites of the European Union about their privileged partnership with Turkey When comparing the attitudes of the European Union towards Turkey versus those towards Central and Eastern Europe one could argue that that return to Europe discourse has accelerated the membership of the latter but not the former Currently Turkey is neither considered an other nor a member of the family Rather Turkey is commonly relegated to the role of crucial neighbor or strategic partner by the political elites of the EU Öner's study analyzes a series of interviews conducted with several members of the European Parliament and sheds serious light on the fact that discussions on Turkey's membership in terms of her Europeanness reveal countless ambiguities in defining European identity It is clear that there is no common understanding or definition of European identity even amongst political leaders in the EU who challenge Turkey's authenticity as a member of European society Thus Selcen Öner's *Turkey and the European Union* The Question of European Identity argues that the position of Turkey vis à vis **Russia and the EU in a Multipolar World** Andrey Makarychev, 2014-11-01 This timely book offers a multifaceted analysis of EU Russian relations drawing on the investigation of competing models of international society Makarychev argues that the huge

variety of interest based and normative models is best explained through the study of foreign policy and identity discourses His approach defies simplistic explanations of EU Russian relations as either destined for cooperation or doomed to constant collisions Instead Makarychev unveils multiple alternatives that both the EU and Russia face in their policies toward each other Assessing the repercussions ongoing EU Russian discord has on Europe and the world Makarychev s volume reveals the interconnectedness of the discourses dominating the EU and Russia while also accounting for the deep seated disconnect between them Bibliographia Medica Hungarica ,1982 Religion in International Relations F. Petito,P.

Hatzopoulos,2003-06-13 Are the secular foundations of international relations sustainable at present This comprehensive study shows how the global resurgence of religion confronts international relations theory with a theoretical challenge comparable to that raised by the end of the Cold War or the emergence of globalization The volume tries to shake the secular foundational myths of the discipline and outline the need for an expansion into religiously inspired spheres of thought It also challenges the most condemning accusation against religion the view that the politicization of religion is always a threat to security and inimical to the resolution of conflict Finally the task of demystifying religion is taken further with an argument for a stronger and progressive political engagement of the worldwide religious traditions in the contemporary globalized era
