Satellite Communications In Europe Law And Regulation:

Satellite Communications in Europe Stewart White, Stephen de B. Bate, Timothy Johnson, 1994 A practical internationally ranging text which considers questions such as what are the procedures for applying for a licence Where are licences for Western and Eastern Europe available What are the regulations concerning the content of transmissions And what are the copyright issues involved *Competition Law and Regulation of the EU Electronic Communications Sector* Liyang Hou, 2012-09-01 This book brings satisfying definition and clarity to this field at last Exploring the substantive differences between competition law and sector specific regulation after the methodological integration it presents the first detailed analysis of the many hundreds of notifications and Commission letters generated under the Article 7 procedure identifying the most relevant cases dealing with market definition market power and remedies It compares these decisions with relevant competition law cases and highlights elements with a bearing on sector specific regulation It also offers hugely valuable guidance through the vast amount of documents in the Commission's CIRCA database Topics and issues raised include the following definition of product markets delineation of geographic markets including sub national different practices in relation to assessing single market power and collective market power and competition problems such as refusal to deal margin squeeze non price discrimination and excessive pricing There can be little doubt that this is the new reference point for researchers and practitioners in this domain By systematically categorizing the concepts and legal criteria and building a solid theoretical framework on the intersection of competition law and sector specific regulation the author has created a resource that is sure to be welcomed by all those involved in regulation of electronic communications markets and network industries in general academic scholars telecommunications regulators at the EU and Member State levels competition authorities law firms specializing in IT communications law practitioners in IT and telecommunications companies and consultants in the sector The book will also prove very useful for scholars and practitioners in other parts of the world interested in comparing the EU system with their own **Satellite Regulation in Europe** Stéphan Le Goueff, 2021-10-25 Commercial satellite activities have undergone enormous growth in the last decades and so has the complexity of the legal framework within which these activities have to be carried out Because of the international character of satellite activities this legal framework has often been established on an international or regional level through institutions such as the European Union the International Telecommunications Union the World Trade Organisation and the European Conference of Postal and Telecommunications Administrations It is not an easy task to obtain a complete picture of this legal framework For this reason it was considered opportune to assemble all relevant legal texts and materials established by these institutions into one book As telecommunications is currently the most important commercial application of satellites it should come as no surprise to anyone that the main part of the book is dedicated to this application simply because of the fact that the legal framework is furthest developed However relevant texts and materials for the three other commercial

satellite activities broadcasting remote sensing and navigation have also been included This book is a very valuable tool for all those involved in the European satellite business or for those who want to get involved in it whether they are lawyers or non lawyers everyone is affected by the laws and regulations governing this field and everyone should be aware of the limitations these laws and regulations might impose *Competition Law and Regulation in European Telecommunications* Pierre Larouche,2000-05-24 Using numerous practical examples this book examines the evolution of EC telecommunications law following the achievement of liberalisation the main policy goal of the 1990s After reviewing the development of regulation in the run up to liberalisation the author identifies the methods used to direct the liberalisation process and tests their validity in the post liberalisation context A critical analysis is made of the claim that competition law will offer sufficient means to regulate the sector in the future Particular emphasis is given to the way in which EC Competition Law changed in the 1990s using the essential facilities doctrine an expansive non discrimination principle and the policing of cross subsidisation to tackle what were then thought of as regulatory matters Also examined within the work is the procedural and institutional interplay between competition law and telecommunications regulation In conclusion Larouche explores the limits of competition law and puts forward a long term case for sector specific regulation with a precise mandate to ensure that the telecommunications sector as a whole fulfils its role as a foundation for economic and social activity **The Concise Encyclopedia of Communication** Wolfgang Donsbach,2015-02-03 This concise volume presents key concepts and entries from the twelve volume ICA International Encyclopedia of Communication 2008 condensing leading scholarship into a practical and valuable single volume Based on the definitive twelve volume IEC this new concise edition presents key concepts and the most relevant headwords of communication science in an A Z format in an up to date manner Jointly published with the International Communication Association ICA the leading academic association of the discipline in the world Represents the best and most up to date international research in this dynamic and interdisciplinary field Contributions come from hundreds of authors who represent excellence in their respective fields An affordable volume available in print or online *Legal Basis for a National Space Legislation* Julian Hermida,2006-04-11 A GENERAL BACKGROUND The foremost goal of the international community in the area of private space launch services should be to induce states to implement effective licensing procedures applicable to commercial ventures for which state responsibility may 1 exist 1 PRIVATE SECTOR PARTICIPATION IN THE SPACE INDUSTRY In the first decades of the space age military and state security motivations indicated the direction of national space programs Now the development of space activities depends essentially upon the possibility of recovering 2 investments Private sector driven commercial endeavors in outer space have been increasing exponentially and have experienced a significant quantitative growth over the last years Spacefarers promote commercial participation of private companies in operations related to outer space and thus the private sector is now increasingly providing satellite telecommunications remote sensing global positioning and space launch

services directly to its customers In this context overall revenues for the worldwide space industry 3 amounted to US 82 billion in 2001 In the late 1990 s the transponder demand in particular Ku band transponders was consistently on the rise due 4 to the escalated utilization of geostationary satellite transponders Global positioning systems have been playing an increasingly important role in navigation and remote sensing systems are mapping and documenting nearly 1 E A Frankle E J Steptoe Legal Considerations Affecting Commercial Space Launches From International Territory 1999 50 IISL at 10
