Crude Awakenings Steve A. Yetiv, 2010-12-15 The real story of global oil over the past twenty five years is not about the spillover effects of Palestinians fighting Israelis or terrorist attacks on U S forces in Saudi Arabia and Yemen or Iraq s stormy relationship with Kuwait It is not even about periodic small and large scale U S attacks on Iraq Rather the real story is about longer term developments that have changed the international relations of the Middle East politics at the global level and world oil markets These developments have increased oil stability from the Introduction Thirty years after OPEC shattered world markets for oil the Western world remains profoundly dependent on foreign particularly Middle Eastern sources of petroleum U S political rhetoric is suffused with claims about the vulnerability caused by this dependence Hence many political analysts assume that a search for stability of petroleum supplies is an important element of contemporary American foreign policy Steve A Yetiv

argues that common assumptions about oil markets are wrong Although prices remain volatile Yetiv's account portrays a world market in petroleum products far more benign and predictable than the one to which we are accustomed In *Crude Awakenings* he identifies and analyzes real and potential threats to the global energy supply including wars revolutions coups dangerous alliances oil embargoes Islamic radicalism and transnational terrorism However he also shows how some of these threats have been mitigated and how global oil security has been reinforced Freedom of Religion Under Bills of Rights

Paul Babie, Neville Rochow, 2012 The Australian Constitution contains no guarantee of freedom of religion or freedom of conscience Indeed it contains very few provisions dealing with rights in essence it is a Constitution that confines itself mainly to prescribing a framework for federal government setting out the various powers of government and limiting them as between federal and state governments and the three branches of government without attempting to define the rights of citizens except in minor respects Whether Australia should have a national bill of rights has been a controversial issue for quite some time This is despite the fact that Australia has acceded to the ICCPR as well as the First Optional Protocol to the ICCPR thereby accepting an international obligation to bring Australian law into line with the ICCPR an obligation that Australia has not discharged Australia is the only country in the Western world without a national bill of rights 4 The chapters that follow in this book debate the situation in Australia and in various other Western jurisdictions From Foreword by The Hon Sir Anthony Mason AC KBE Human Rights and Courts **The International Politics of the Red Sea**

Anoushiravan Ehteshami, Emma C. Murphy, 2013-03-01 This pioneering book is the first comprehensive study of the Red Sea as a sub region of the international system in its own right Examining the international politics of the Red Sea region from the Cold War to the present day it argues that the Red Sea area demonstrates the characteristics of a sub regional system given its increasing economic and social interdependence greater regional integration and flows of resources across it It details how stronger regional powers Egypt Israel and Saudi Arabia which co habit the sub region with much weaker vulnerable and fragile states are seeking to stamp their own authority on this dynamic sub region They have attempted to do so the authors show through extension of their military and economic influence where ever possible while also forging regional partnerships aimed at protecting their interests or to fend off possible encroachment of others The book discusses in great detail the security and military dynamics of the sub region land and maritime borders as well as economic issues including trade migration capital flows and transport It covers developments across the Red Sea and also within all the states of this newly forming sub region Ballistic Missile Proliferation in Non-Nuclear States Karim El-Baz, Ali

Ghanbarpour-Dizboni, 2024-08-14 This book offers an exploration of ballistic missile proliferation in the Middle East and also delves into the geopolitical landscape to unveil a narrative of contemporary Middle Eastern history The central focus of this book is to decipher the pivotal moments when three regional powers of the Middle East Egypt Saudi Arabia and Iran embraced ballistic capabilities as a strategic response to military vulnerabilities The authors contend that the very essence of

ballistic proliferation incorporates a tactical rationale provided by military needs that varies from one state to another and it is upon the assessment of these military needs that the decision to procure ballistic missiles is made. Offering a blend of theoretical insights and primary sources based case studies, this book dissects the decision making processes that spurred these states to choose ballistic missiles despite their inefficiencies in delivering conventional payloads. The absence of an effective air force emerges as a catalyst triggering what the authors term a moment of ballistic consciousness. Spanning three diverse regimes, the work provides a rich historical tapestry and untangles the complexities of political decisions with military implications, providing a fresh perspective on global power dynamics. This narrative sheds light on the intersection of military strategy, geopolitical realities, and the pursuit of ballistic capabilities that shapes the world's security landscape. This book will be of much interest to students of arms control, nuclear proliferation, Middle Eastern politics, and International Relations.

Outsourcing Security Bruce E. Stanley, 2015-07-15 Faced with a decreasing supply of national troops, dwindling defense budgets, and the ever rising demand for boots on the ground in global conflicts and humanitarian emergencies, decision makers are left with little choice but to legalize and legitimize the use of private military contractors (PMCs). *Outsourcing Security* examines the impact that bureaucratic controls and the increasing permissiveness of security environments have had on the U.S. military's growing use of PMCs during the late twentieth and early twenty-first centuries. Bruce E. Stanley examines the relationship between the rise of the private security industry and five potential explanatory variables tied to supply and demand theory in six historical cases, including Operation Desert Storm in 1991, the U.S. intervention in Bosnia in 1995, and Operation Iraqi Freedom in 2003. *Outsourcing Security* is the only work that moves beyond a descriptive account of the rise of PMCs to lay out a precise theory explaining the phenomenon and providing a framework for those considering PMCs in future global interaction.

Global Empowerment of Women Carolyn M. Elliott, 2007-12-12 The empowerment of women is a broadly endorsed strategy for solving a host of difficult problems, from child poverty to gender violence to international development. The seventeen international scholars in this multi-disciplinary volume offer thoughtful critiques of the notion of empowerment based on their studies in twenty countries in all regions of the world. The comparative introduction places concepts of empowerment in the context of models of the market and of community, showing how contradictions in these models as they are enacted on the ground provide both spaces and constraints for women. The chapters consider opportunities for women in the context of globalization, resurgent nationalism, and politicized religion; cultures of masculinity and the HIV/AIDS epidemic in Africa. They show how initiatives at national or global levels are transformed by local cultures and power structures and demonstrate the fruitfulness of tensions between universal values of human rights and

Korea Syria Turkey and Taiwan flesh out this framework and show how even these countries might be pushed over the edge of a nuclear tipping point The authors offer prescriptions that would both prevent such countries from reconsidering their nuclear option and avert proliferation by others The stakes are enormous and success is far from assured To keep the tipping point beyond reach the authors argue the international community will have to act with unity imagination and strength and Washington s leadership will be essential Contributors include Leon Feurth George Wash
