more important The chapters indicate that hardship and suffering do not necessarily make us unhappy and they suggest therapeutical implications for improving the quality of life Specific topics covered include the formation of optimal childhood values and habits as well as a new perspective on aging This volume provides a powerful counterpoint to a mistakenly reductionist psychology They show that subjective experience can be studied scientifically and measured accurately They highlight the potentiality for autonomy and freedom that is among the most precious elements of the human condition Moreover they make a convincing case for the importance of subjective phenomena which often affect happiness more than external material conditions After long decades during which psychologists seemed to have forgotten that misery is not the only option the blossoming of Positive Psychology promises a better understanding of what a vigorous meaningful life may consist of

Beyond Imported Magic Eden Medina, Ivan Da Costa Marques, Christina Holmes, 2014-08-15 Studies challenging the idea that technology and science flow only from global North to South The essays in this volume study the creation adaptation and use of science and technology in Latin America They challenge the view that scientific ideas and technology travel unchanged from the global North to the global South the view of technology as imported magic They describe not only alternate pathways for innovation invention and discovery but also how ideas and technologies circulate in Latin American contexts and transnationally The contributors explorations of these issues and their examination of specific Latin American experiences with science and technology offer a broader more nuanced understanding of how science technology politics and power interact in the past and present The essays in this book use methods from history and the social sciences to investigate forms of local creation and use of technologies the circulation

of ideas people and artifacts in local and global networks and hybrid technologies and forms of knowledge production They address such topics as the work of female forensic geneticists in Colombia the pioneering Argentinean use of fingerprinting technology in the late nineteenth century the design use and meaning of the XO Laptops created and distributed by the One Laptop per Child Program and the development of nuclear energy in Argentina Mexico and Chile Contributors Pedro Ignacio Alonso Morgan G Ames Javiera Barandiar n Jo o Biehl Anita Say Chan Amy Cox Hall Henrique Cukierman Ana Delgado Rafael Dias Adriana D az del Castillo H Mariano Fressoli Jonathan Hagood Christina Holmes Matthieu Hubert Noela Invernizzi Michael Lemon Ivan da Costa Marques Gisela Mateos Eden Medina Mar a Fernanda Olarte Sierra Hugo Palmarola Tania P rez Bustos Julia Rodriguez Israel Rodr guez Giralt Edna Su rez D az Hern n Thomas Manuel Tironi Dominique Vinck *The Archaeology of Violence* Sarah Ralph,2013-01-17 The Archaeology of Violence is an interdisciplinary consideration of the role of violence in social cultural and sociopolitical contexts The volume draws on the work of archaeologists anthropologists classicists and art historians all of whom have an interest in understanding the role of violence in their respective specialist fields in the Mediterranean and Europe The focus is on three themes contexts of violence politics and identities of violence and sanctified violence In contrast to many past studies of violence often defined by their subject specialism or by a specific temporal or geographic focus this book draws on a wide range of both temporal and spatial examples and offers new perspectives on the study of violence and its role in social and political change Rather than simply equating violence with warfare as has been done in many archaeological cases the volume contends that the focus on warfare has been to the detriment of our understanding of other forms of non warfare violence and has the potential to affect the ways in which violence is recognized and discussed by scholars and ultimately has repercussions for understanding its role in society

The Global First World War Ana Paula Pires,María Inés Tato,Jan Schmidt,2021-04-14 This volume deals with the multiple impacts of the First World War on societies from South Europe Latin America Asia and Africa usually largely overlooked by the historiography on the conflict Due to the lesser intensity of their military involvement in the war neutrals or latecomers these countries or regions were considered peripheral as a topic of research However in the last two decades the advances of global history recovered their importance as active wartime actors and that of their experiences This book will reconstruct some experiences and representations of the war that these societies built during and after the conflict from the prism of mediators between the war fought in the battlefields and their homes as well as the local appropriations and resignifications of their experiences and testimonies **Multisensory Perception and Action: psychophysics, neural mechanisms, and applications** Zhuanghua Shi,Hermann Josef Mueller,2015 **Ludwig Leichhardt's Ghosts** Andrew Wright Hurley,2018 A fascinating cultural studies account of the afterlife of Leichhardt revealing both German entanglement in British colonialism in Australia and in a broader sense what happens when we maintain an open stance to the ghosts of the past *Financial Markets and Organizational Technologies* A. Kyrtsis,2015-12-11 This book is a valuable companion for

everyone who is interested in the historical context of the co evolution of financial markets and information technologies in the last 30 years The contributors analyze system architectures and solution technologies in banking and finance by focusing on the particularities of certain practices and risks

Archaeologies of Internment Adrian Myers, Gabriel Moshenska, 2011-05-24 The internment of civilian and military prisoners became an increasingly common feature of conflicts in the twentieth century and into the twenty first Prison camps though often hastily constructed and just as quickly destroyed have left their marks in the archaeological record Due to both their temporary nature and their often sensitive political contexts places of internment present a unique challenge to archaeologists and heritage managers As archaeologists have begun to explore the material remains of internment using a range of methods these interdisciplinary studies have demonstrated the potential to connect individual memories and historical debates to the fragmentary material remains Archaeologies of Internment brings together in one volume a range of methodological and theoretical approaches to this developing field The contributions are geographically and temporally diverse ranging from Second World War internment in Europe and the USA to prison islands of the Greek Civil War South African labor camps and the secret detention centers of the Argentinean Junta and the East German Stasi These studies have powerful social cultural political and emotive implications particularly in societies in which historical narratives of oppression and genocide have themselves been suppressed By repopulating the historical narratives with individuals and grounding them in the material remains it is hoped that they might become at least in some cases archaeologies of liberation
