Eden's Garden Richard J. Coleman, 2007 The time is ripe for a robust discussion of human nature In *Eden's Garden* Rethinking Sin and Evil in an Era of Scientific Promise Richard Coleman examines the notion of sin in a contemporary world that values scientific and nonreligious modes of thought regarding human behavior This work is not an anti science polemic but rather an argument to show how sin and evil can make sense to the nonreligious mind and how it is valuable to make sense of such phenomena The author reconceptualizes sin and evil as indelible pieces of our evolutionary history preventing them from being ostracized as too religious without substance mired in the past Coleman redeems theology for what it can offer to the understanding of sin and evil while embracing and respecting what science can offer to further the common good Examining themes in religion philosophy and theology it is ideal for use in the numerous courses that move across these disciplines
