Shark Dean Crawford,2008-08-01 A sleek hunter of the seas the shark has struck fear into the hearts of men since the days of the first fishermen Dean Crawford now explores here the long relationship between shark and man revealing that behind the fearsome caricature is a complex animal that deserves a thoughtful reconsideration With a lineage stretching back over 100 million years the shark has evolved into 350 different species from the great white to the pike bearing goblin to the tiny cookie cutter Crawford compiles here a fascinating narrative that analyzes how and why the animal looms large in our cultural psyche While sharks have played a prominent part in religion and mythology they are more commonly perceived as deadly predators in such films as Jaws and Dr No or as symbols of natural violence as in Hemingway's Islands in the Stream Shark ultimately argues however that our ill informed emotional responses spurred by such representations have encouraged the wholesale slaughter of sharks and our ignorance endangers the very existence of the shark today Both a celebration of their lethal beauty and plea for their conservation Shark urges us to shed our fears and appreciate the magnificence of this majestic animal
