Save Generations Y And Z:

Generation on a Tightrope Arthur Levine, Diane R. Dean, 2012-09-04 Today's college students feel as if they are crossing an abyss between their dreams and the reality of an uncertain future. They are a generation seeking stability in a time of profound and accelerating change. They want government and our other social institutions to work in a time when they're broken; they cling to the American Dream in an age of diminished expectations. They are walking a tightrope attempting to balance digital connectedness and personal isolation, global citizenship and local vision, commonality and difference in the most diverse generation in American history and a desire to be treated as mature adults while being more dependent on their parents than previous college students. *Generation on a Tightrope* offers a compelling portrait of today's undergraduate college students that sheds light on their attributes, expectations, aspirations, academics, attitudes, values, beliefs, social lives, and politics. Based on research of 5,000 college students and student affairs practitioners from 270 diverse college campuses, the book explores the similarities and differences between today's generation of students and previous generations. The authors examine the myriad forces that have shaped these students and will continue to shape them as they prepare to meet the future. The first two volumes in this series exploring the psyche of college students: *When Dreams and Heroes Died* (1980) and *When Hope and Fear Collide* (1998) offered thoughtful and accurate profiles of the students of the 1980s and 1990s. As *Generation on a Tightrope* clearly reveals, today's students need a very different education than the undergraduates who came before them: an education for the 21st Century which colleges and universities are ill-equipped to offer and which will require major changes of them to provide. Painting a realistic picture of today's college students, the authors offer guidance to higher education professionals, researchers, practitioners, policymakers, employers, parents, and the public. The book's insights can help them equip students for the world they face and the world they will help to create.

Economic Challenges and Young Adults Magdalena Osińska, 2025-06-17 In recent years, there has been an unprecedented shift in the attitudes of young individuals towards the key economic issues they encounter as they embark on their adult lives. Sociologists have identified two distinct generations, namely Generation Y and Generation Z, which exhibit behaviours contrary to those of their parents and older generations. The reasons behind these shifts are shared across European countries where these generations have experienced lives characterized by peace, cultural diversity, globalization, economic stability, relative economic and social well-being, as well as parental care and education. Addressing a gap in the economic literature, this book uniquely bridges the

current understanding of youth with empirical evidence specific to Central and Eastern European Countries represented by Poland and Czechia Germany was taken as an example of a Western European Country The novelty lies in identifying the contemporary trends and determinants shaping the decision making process of young adults regarding the labour market savings and investments job satisfaction retirement and sustainable consumption The book draws on a theoretical foundation from both economic and sociological perspectives The book comprises ten interconnected chapters each contributing to the central theme of youth intentions and attitudes toward economic financial issues The summary is presented from the perspective of contemporary megatrends The target audience includes students and researchers in fields related to contemporary economic challenges such as economics psychology and sociology Given the challenges faced by young adults from post socialist states implementing the policy recommendations in the book may contribute to reducing the gap between them and their counterparts in Western European countries Institutions involved in social policy including both non governmental organizations and public entities will also find the policy implications to be of interest
