Preserving Rural Australia A Robertson, R Watts, 1999-01-01 Scientific knowledge alone will not help countries achieve sustainable management of land water and biota Everyone now realises that a partnership is needed between land and water users scientists managers and the community if countries are to achieve the goal of preserving rural resources This book deals with broad issues relating to resource decline and how different groups such as farmers rural town dwellers resource managers and government deal with these issues from social economic and ecological points of view **Carnivore**

Conservation John L. Gittleman, 2001-06-28 Carnivores are the focus of intense attention and resources in conservation biology It is often argued that because carnivores are at the top of the food chain if they are protected then other taxa will also be afforded adequate protection Carnivores are also charismatic and compete with humans for dwindling space and environmental resources In the past 10 years theoretical and empirical studies on carnivores have developed very quickly This volume reviews and summarises the current state of the field describes limitations and opportunities for carnivore conservation and offers a conceptual framework for future research and applied management As such it will be of interest to students and researchers of conservation biology mammalogy animal behaviour ecology and evolution **Shades of Green** Christof Mauch, Nathan Stoltzfus, Douglas R. Weiner, 2006-07-24 *Shades of Green* examines the impact of political economic

religious and scientific institutions on environmental activism around the world The book highlights the diversity of national regional and international environmental activism showing that the term environmentalism covers an entire range of perceptions values and interests It demonstrates that each instance of environmental activism is shaped by historically unique circumstances highlighting within each chapter the ideological social and political origins of efforts to protect the environment Discussing issues unique to different parts of the world *Shades of Green* shows that environmentalism around the globe has been strengthened weakened or suppressed by a variety of local national and international concerns politics and social realities

Conserving Forest Biodiversity David B. Lindenmayer, Jerry F. Franklin, 2013-04-10 While most efforts at biodiversity conservation have focused primarily on protected areas and reserves the unprotected lands surrounding those area the matrix are equally important to preserving global biodiversity and maintaining forest health In *Conserving Forest Biodiversity* leading forest scientists David B Lindenmayer and Jerry F Franklin argue that the conservation of forest biodiversity requires a comprehensive and multiscaled approach that includes both reserve and nonreserve areas They lay the foundations for such a strategy bringing together the latest scientific information on landscape ecology forestry conservation biology and related disciplines as they examine the importance of the matrix in key areas of ecology such as metapopulation dynamics habitat fragmentation and landscape connectivity general principles for matrix management using natural disturbance regimes to guide human disturbance landscape level and stand level elements of matrix management the role of adaptive management and monitoring social dimensions and tensions in implementing matrix based forest management In addition they present five case studies that illustrate aspects and elements of applied matrix management in forests The case studies cover a wide variety of conservation planning and management issues from North America South America and Australia ranging from relatively intact forest ecosystems to an intensively managed plantation *Conserving Forest Biodiversity* presents strategies for enhancing matrix management that can play a vital role in the development of more effective approaches to maintaining forest biodiversity It examines the key issues and gives practical guidelines for sustained forest management highlighting the critical role of the matrix for scientists managers decisionmakers and other stakeholders involved in efforts to sustain biodiversity and ecosystem processes in forest landscapes
