J. Kleinberg,2010-10-01 The experiences

of widows and their children during the Progressive Era and the New Deal depended on differences in local economies and values How did these widely varied experiences impact the origins of the welfare state S J Kleinberg delves into the question by comparing widows lives in three industrial cities with differing economic ethnic and racial bases Government in Fall River Massachusetts saw employment as a solution to widows poverty and as a result drastically limited public charity In Pittsburgh widows received sympathetic treatment Few jobs existed for them or their children indeed the jobs for men were concentrated in widowmaking industries like steel and railroading With a large African American population and a diverse economy that relied on inexpensive child and female labor Baltimore limited funds for public services African Americans adapted by establishing their own charitable institutions A fascinating comparative study Widows and Orphans First offers a one of a kind look at social welfare policy for widows and the role of children in society during a pivotal time in American history

Bowling Alone: Revised and Updated Robert D. Putnam, 2001-08-01 Once we bowled in leagues usually after work but no longer This seemingly small phenomenon symbolizes a significant social change that Robert Putnam has identified in this brilliant volume Bowling Alone which The Economist hailed as a prodigious achievement Drawing on vast new data that reveal Americans changing behavior Putnam shows how we have become increasingly disconnected from one another and how social structures whether they be PTA church or political parties have disintegrated Until the publication of this groundbreaking work no one had so deftly diagnosed the harm that these broken bonds have wreaked on our physical and civic health nor had anyone exalted their fundamental power in creating a society that is happy healthy and safe Like defining works from the past such as The Lonely Crowd and The Affluent Society and like the works of C Wright Mills and Betty Friedan Putnam's Bowling Alone has identified a central crisis at the heart of our society and suggests what we can do

Conflicting Paths Harvey J. Graff,1995 We grow up so simple it just seems to happen and yet there are endless variations in the way we do it What part does culture play in the process How much do politics and economics have to do with it As the nation has matured have the ways people grow up changed too This book traces the many paths to adulthood that Americans have pursued over time Spanning more than two centuries of intense transformation in the lives of individuals and the life of a nation *Conflicting Paths* is an innovative history of growing up in

America Harvey J Graff a distinguished social historian mines more than five hundred personal narratives for what they can tell us about the passage from childhood to maturity Drawing on diaries memoirs autobiographies and letters he builds a penetrating complex firsthand account of how childhood adolescence and youth have been experienced and understood as functions of familial and social relations as products of biology and physiology and as cultural and political constructs These first person testimonies cross the lines of time and space gender and class ethnicity age and race In these individual stories and the larger story they constitute Graff exposes the way social change including institutional developments and shifting attitudes expectations and policy and personal experience intertwine in the process of growing up Together these narratives form a challenging subtle guide to historical experiences and to the epochal remaking of growing up The most socially inclusive and historically extensive of any such research Graff s work constitutes an important chapter in the story of the family the formation of modern society and the complex interweaving of young people tradition and change

Fostering on the Farm Megan Birk, 2015-06-15 From 1870 until after World War I reformers led an effort to place children from orphanages asylums and children s homes with farming families The farmers received free labor in return for providing room and board Reformers meanwhile believed children learned lessons in family life citizenry and work habits that institutions simply could not provide Drawing on institution records correspondence from children and placement families and state reports Megan Birk scrutinizes how the farm system developed and how the children involved may have become some of America s last indentured laborers Between 1850 and 1900 up to one third of farm homes contained children from outside the family Birk reveals how the nostalgia attached to misplaced perceptions about healthy family based labor masked the realities of abuse overwork and loveless upbringings endemic in the system She also considers how rural people cared for their own children while being bombarded with dependents from elsewhere Finally Birk traces how the ills associated with rural placement eventually forced reformers to transition to a system of paid foster care adoptions and family preservation

The Family in America Joseph M. Hawes, Elizabeth F. Shores, 2002-05-22 An incisive multidisciplinary look at the American family over the past 200 years

written by respected scholars and researchers *Family in America* offers two powerful antidotes to popular misconceptions about American family life historical perspective and scientific objectivity When we look back at our early history we discover that the idealized 1950s family characterized by a rising birthrate a stable divorce rate and a declining age of marriage was a historical aberration out of line with long term historical trends Working mothers we learn are not a 20th century invention most families throughout American history have needed more than one breadwinner In the exciting new scholarship described here readers will learn precisely what is new in American family life and what is not and acquire the perspective they need to appreciate both the genuine improvements and the losses that come with change

Second Home Timothy A. Hacsí, 1997 As Timothy Hacsí shows most children in nineteenth century orphan asylums were half orphans children with one living parent who was unable to provide for them The asylums spread widely and endured because different groups churches ethnic communities charitable organizations fraternal societies and local and state governments could adapt them to their own purposes In the 1890s critics began to argue that asylums were overcrowded and impersonal By 1909 advocates called for aid to destitute mothers and argued that asylums should be a last resort for short term care only Yet orphanages continued to care for most dependent children until the Depression strained asylum budgets and federally funded home care became more widely available Yet some Catholic asylums in particular cared for poor children into the 1950s and 1960s
