Long Live Geopolitical Mining Eduardo Zamanillo, Marta Rivera, 2025-08-28 Mining Is Dead Long Live the New Geopolitical Mining While Western capitals lawyered the future China engineered the supply chain Critical minerals lithium copper rare earths nickel graphite are no longer commodities they are the invisible infrastructure of power From AI and clean energy to defense and space entire strategies now hinge on who controls the midstream and the downstream China understood this first As the United States Europe Canada and Australia cycled through layered impact assessments duplicative approvals and overlapping reviews a misapplication of well intended legislation that prioritized form over substance Beijing invested with long term vision built refineries secured supply chains and turned critical minerals into political industrial and technological sovereignty It did not stop at extraction China processed added value and consolidated control of the midstream and downstream transforming resources into true industrial power This book is a playbook for the new era of Geopolitical Mining With up to date data regional comparisons and a practical framework for decision makers it shows how Africa Latin America and Asia beyond China are becoming decisive arenas and what leaders must do before supply chains lock in Crucially it explains why symbolism matters how the stories nations tell about mining purpose identity and meaning become strategic assets that create trust legitimacy and consent Sovereign speed as the decisive advantage Symbolism it is about understanding the invisible forces shaping our future The mining we knew is gone welcome to the era we call Geopolitical Mining

The Project is Dead ... Long Live the Project! Andreas von Grebmer, 2004 *Socialism Is Dead! Long Live Socialism!* Todor Bombov, 2017-01-10 This work is divided into two autonomous books The first book The State represents a radically new political system of society one which is the most democratic system ever possible This is a completely new society a real civil society which otherwise in the capitalist system is only a utopia In this book I scrutinize the principles of scientific socialism i.e. all those principles of Marxism concerning the state that build socialism as a political system The second book The Economic Theory of Socialism is a sequel and as far as I know the only sequel of the greatest work by Karl Marx Capital The economics of socialism makes Marx's socialism already completely possible In this book I scrutinize the economic laws that build socialism as a more effective economic system than capitalism These laws are extracted from Marx's main work Capital From 1917 to 1991 the totalitarian system in USSR and East Europe was called socialism and even by the scientific nonsense and absurd names of communism and communist system In this system the official ideology was allegedly Marxism but really it could not endure any Marxist criticism There was never any socialism anywhere In the twentieth century we passed through a system of utopian socialism as proof that this was not socialism that was not possible but for the utopia of writers before and after Marx We were visited by a utopian socialism which at the contemporary stage is simply capitalism state monopolistic There is no better application of Keynes's doctrine than the socialism of the twentieth century His planned capitalism is actually planned socialism
